

Cancelled	36
Cancelled	37
Alder, Arne Mining the kinome of the malaria parasite to detect novel drug targets	38
Cancelled	39
Alonso Meyer, Victor Syntaxin-mediated vesicle trafficking drives apicoplast biogenesis in Plasmodium falciparum	40
Cancelled	41
Anaguano-Pillajo, David Redox regulation of FIKK kinases in Plasmodium falciparum–infected red blood cells	42
Arrindel, Jeffrey Extracellular vesicle–associated YIR proteins as novel modulators of innate immune responses	43
Cancelled	44
Atlaw, Elon Investigating how variation in malaria vaccine candidate, PfRh5 Impacts immune evasion	45

Back, Peter		
DNA-PAINT exposes subtle spatial differences in the basal complex		46
Baron, Ludivine	Presenter: Real, Eliana; Baron, Ludivine	
PlasMIQ: a versatile image analysis framework to accelerate antimalaria discovery		47
Belda, Hugo		
Functional assessment of the conserved FIKK kinase in apicomplexan basal complex biology		48
Berkowitz-Sklar, Khiara		
A single-cell RNA sequencing approach to investigate Plasmodium falciparum persistence across the dry season		49
Bevino, Giulia	Presenter: Lombardo, Fabrizio	
Early mosquito immune patterns correlate with differential Plasmodium falciparum ookinete load		50
Bhattacharjee, Souvik		
A Plasmodium falciparum redox survival mechanism licenses killing by artemisinins		51
Biaou, Djelili		
Low functional antibodies to P. falciparum antigens in beninese neonates further reduced the time to first malaria infection in infancy following placental malaria		52
Biswas, Shreeja		
A host pan-anchorage receptor defines a convergent control point in Plasmodium invasion		53
Böhme, Ulrike	Presenter: Böhme, Ulrike; Roos, David	
VEuPathDB: sustainable Informatics tools for genomic-scale data exploration, analysis, integration, discovery and dissemination		54

Boshoven, Cas	
Identifying the writers of histone lactylation in Plasmodium falciparum	55
Bozdech, Zbynek	
Population genomics and transcriptomics of Plasmodium falciparum artemisinin resistance reveal a complex genetic trait operating at several levels.	56
Brinkworth, Alice	
In situ structural characterisation of the plasmodium falciparum microgamete flagellum	57
Burzynska, Patrycja	
The role of basigin glycans in the interaction with Plasmodium falciparum merozoite ligand RH5	58
Busse, Caroline	
Actin-like proteins 3 and 5a are essential for Plasmodium oocyst formation and development	59
Cabahug, Maureen	
Hole-y nuclear architecture! ExM expands our knowledge of parasite spatio-temporal transcriptional regulation	60
Candelas, Adrian	
How does Plasmodium falciparum rewire endothelial mechanics?	61
Canning, Jessica	
Investigating malaria specific B cells in secondary lymphoid tissues in children.	62
Canning, Jessica	
Investigating malaria specific B and CD4 T cells following full-length MSP1 vaccination.	63
Carril, Olivia	
Ribosomal RNA modification dynamics across the life cycle of Plasmodium falciparum	64

Cancelled	65
Cosson, Anna Switching antimalarial treatment from piperazine to mefloquine promotes malaria elimination in Cambodia	66
De Meulenaere, Katlijn A Plasmodium knowlesi A1-H.1 transcriptome time course focusing on the late asexual blood stages	67
Dechavanne, Celia Presenter: Djèdémè, Junior Seasonal prevalence of Pfhrp2 and Pfhrp3 gene deletion in Plasmodium falciparum in southern Benin	68
Diallo, Mariama Telly Malaria resurgence in Rwanda associated with co-occurrence of kelch13 K189T and R561H and amplification of pre-existing Plasmodium falciparum genetic diversity	69
Diaz, Dalia Combined in vitro strategies for characterization of P. vivax TRAg proteins during erythrocyte invasion in the human host	70
Domènech Eres, Robert From fusion to conquest: how Plasmodium falciparum SNARE proteins orchestrate erythrocyte takeover	71
DonVito, Sophia Using transgenic Plasmodium knowlesi to investigate the role of Plasmodium vivax DBP and RBP2b in host cell tropism during erythrocyte invasion	72
Duffy, Michael F. Plasmodium falciparum bromodomain proteins are essential for regulating gene expression throughout development and for maintaining chromatin state.	73

Elam, Tal	
A sap-domain protein is involved in regulation of multi-copy gene families in Plasmodium falciparum	74
Fachet, Dominik	
Plasmodium microtubules mechanics and kinetics in different environments	75
Cancelled	76
Frey, Clarissa	
Seasonal modulation of host factors affecting cytoadhesion of Plasmodium falciparum-infected erythrocytes	77
Galindo Cubillos, Eliana Fernanda	
Characterization of the protein enhancer of rudimentary homolog (ERH) in Plasmodium falciparum and its role in intraerythrocytic development	78
Galocha, Mónica	
Unraveling liver stage replication control in Plasmodium	79
Gaye, Abdoulaye	
Host-vector interactions sustaining malaria persistence in kobeni, mauritania	80
Geoghegan, Vincent	
RIFINs binding human PECAM1 discovered by avidity interaction screening of a RIFIN V2 hypervariable domain library	81
Gestal Mato, María	
Febrile temperature as a host response that favors Plasmodium falciparum vasculature cytoadhesion via endothelial glycocalyx disruption	82
Gibbins, Matthew	
Imaging the influence of mosquito biting on plasmodium berghei gametocytes	83

Gonzelez, Judit	
Modeling microglia-driven pathogenesis in cerebral malaria using a human iPSC-derived immune-competent 2D & 3D BBB model	84
Grannell, Alex	
Babesia divergens thrombospondin related anonymous protein 2 (BdTRAP2) is important for red blood cell egress and invasion	85
Grünebast, Janne	
Hundreds of P. falciparum lncRNAs are stage-specifically expressed during asexual development and gametocytogenesis	86
Cancelled	87
Guttery, David S.	
The plant-like Plasmodium protein phosphatase, PPKL, defines collar polarity and subpellicular microtubule architecture during zygote-to-ookinete transition	88
Hackmann, Amke	
CPH1, an apicomplexan-specific conoid complex protein, is required for motility in Plasmodium berghei ookinetes	89
Hair, Molly	
Three-dimensional ultrastructural insights into basal body biogenesis and gamete function in Plasmodium berghei	90
Hamad, Khansaa Abdalbagi Alneel	
Plasmodium falciparum cytoadhesion dynamics in seasonal malaria transmission settings	91
Hammal, Laleen	
Identification of novel inhibitors of purine salvage enzymes of plasmodium through biochemical and biophysical methods: An outlook towards the treatment of Malaria	92
Hart, Melissa	
To process or not to process: the role of the PfRh5 pro-domain in red blood cell invasion	93

Heuser, Mia		
From asexual replication to commitment: PfCHD1 as an essential chromatin remodeler across <i>P. falciparum</i> development		94
Horackova, Vendula		
KIC12 is a cytosomal protein that controls both endocytosis and sexual commitment in <i>P. falciparum</i> parasites		95
Introini, Viola		
Modelling complex host-parasite interactions across scales		96
Ivanova, Maria	Presenter: Johnson, Monique	
Organ barseq screens in <i>Plasmodium berghei</i> : a new tool for identifying critical mediators of malaria parasite sequestration		97
Jackson, Andrew	Presenter: van Ooij, Christiaan	
Pirfectly essential: identification of an essential PIR protein and the phylogenetics of the pir gene family		98
Kabagenyi, Joy		
Master regulators: single cell and spatial transcriptomics reveal NK and $\gamma\delta$ T cells drive immune reprogramming in malaria		99
Kahler, Sophia		
The role of mosquito and parasite lipid transporters in <i>P. falciparum</i> parasite development and infectivity		100
Cancelled		101
		102
Cancelled		
		103

Kok, Michelle	
Building a morphological screening toolkit to uncover antimalarial drug mechanisms in Plasmodium falciparum gametocytes.	104
Kucharski, Michal	
Beyond kelch13: redefining the genomic architecture of artemisinin resistance in P. falciparum in Africa	105
Kudulyte, Aiste	
Heterogeneous and transient nuclear accumulation of Plasmodium falciparum PCNA1 depends on DNA association	106
Kühne, Vera	
Titel: novel tools to measure Plasmodium falciparum sexual conversion in natural infections: automated immune-fluorescence and gene expression based assays.	107
Kumar, Thrishla	
A conserved apical role: PfSET9 coordinates merozoite invasion in Plasmodium falciparum	108
Cancelled	109
Cancelled	110
Cancelled	111
Landeau Millan, Patricia	
Expression and functional characterization of gametocyte-specific PHISTA-like proteins in Plasmodium falciparum	112

Längst, Gernot		
Histone variant-dependent nucleosome positioning code in <i>Plasmodium falciparum</i> and humans		113
Lauw, Nicky		
Sequence and structural diversity of variant surface antigens in <i>P. falciparum</i>		114
Lawton, Jonathan	Presenter: Hussen, Sakib	
Cerebral malaria-associated var gene clusters identified via reference-free transcriptomics and machine learning		115
Lempereur, Sander		
A genetic screening approach to understand crystalloid biogenesis in <i>P. berghei</i> ookinetes.		116
Levendis, Josh		
Cut to the point: m6A facilitates poly-adenylation in <i>Plasmodium falciparum</i> mRNA		117
Liffner, Benjamin		
Using expansion microscopy to understand mosquito-stage parasite biology and parasite-mosquito interactions		118
Liu, Jingnan		
Engineering an orally virulent <i>Beauveria</i> strain boosts intestinal infection efficacy for mosquito control		119
López Barona, Patricia		
<i>Plasmodium falciparum</i> cytostomes are long-term stable structures composed of two concentric rings with defined protein composition		120
Maacke, Lina		
A conserved nyn/pin-like domain of <i>gdv1</i> controls sexual commitment but not chromatin localization in <i>plasmodium falciparum</i>		121
Madan, Sonakshi		
Genomic epidemiology of clinical and asymptomatic malaria infections at low transmission		122

Magallon-Tejada, Ariel	
Modulation of erythrocyte biomechanics by dibenzyl trisulfide reduces Plasmodium falciparum invasion and cytoadhesion	123
Malhotra, Rashim	
Antisense regulation and diagnostic adaptation in plasmodium falciparum	124
Cancelled	125
Mao, Emma	
Bassianolide, a fungal cyclic depsipeptide, potently inhibits mitotic progression in Plasmodium falciparum.	126
Mathis, Emilie	
A reversible replication-stress arrest reveals checkpoint-like control of IDC progression in Plasmodium falciparum	127
Cancelled	128
Metwally, Nahla	
Cell-Specific miRNA/mRNA profiling of blood-brain barrier components following cytokines and parasite stimulation: implications for cerebral malaria pathogenesis	129
Mishra, Akancha	Presenter: Mishra, Akancha; Ratkeviciute, Giedre
GAPMs form a heterotrimeric complex bridging the glideosome across plasmodium species	130
Mridha, Saptarshi	
Understanding the role of lipid metabolism in mediating artemisinin tolerance in plasmodium falciparum	131

Muchaamba, Gillian		
Revisiting the biology of avian Plasmodium parasites in zoo-kept and wild birds		132
Müller-Marquardt, Francesca		
Functional characterisation of a highly conserved strain-transcending RIFIN		133
Musa, Sherihan	Presenter: Pradel, Gabriele	
SET2 sets the sex: epigenetic control of gametocyte fate in Plasmodium falciparum		134
Nagar, Poonam		
Plasmodium falciparum cysteine protease falcipain 3: a potential enzyme for proteolytic processing of histone acetyltransferase PfGCN5		135
Nayak, Sourav		
STR polymorphisms as a putative regulator of gene expression in Plasmodium falciparum		136
Cancelled		137
Cancelled		138
Cancelled		140
Nofal, Stephanie Diane		
Unravelling the role of exported effectors on host cell remodelling during Plasmodium falciparum gametocyte infection		141

EMBL Conference: BioMalPar XXII: biology and pathology of the malaria parasite

Nofal, Stephanie Diane	Presenter: Nofal, Stephanie Diane; Belda, Hugo; Fuchs, Gwendolin	
How we halved transfection times, broke up with WR99210 and developed a novel PKG_T618Q selection cassette.		142
Nyarko, Prince		
Characterisation of the P. falciparum heat-shock response at the protein level		143
Nyirongo, Joyce		
Plasmodium falciparum merozoite production and selectivity in red blood cell invasion in newly-adapted clones		144
Olivieri, Anna		
Design, synthesis and biological evaluation of Rac1-targeting carbazole-pyrimidines as host-directed antimalarials		145
Oncins Suñol, Anna		
Single-cell transcriptomic profiling of Plasmodium falciparum basal and environmentally-induced sexual commitment		146
Oyerinde, Olawunmi		
Understanding the role of CD8+ T cells in cerebral malaria pathogenesis using a 3D blood-brain barrier model		147
Panda, Ashutosh		
Exportome rewiring couples cytoadherence and Th17 amplification in severe plasmodium falciparum malaria		148
Cancelled		149
Paone, Silvio		
Rac1 protein interactions in human erythrocytes as a basis for selective host-directed antimalarial drug design		150
Pareek, Kapil		
Investigating histone lactylation as a novel epigenetic modification in the malaria parasite P. falciparum		151

Parres Mercader, Marina		
Cell plasticity during sexual differentiation in plasmodium falciparum field isolates		152
Pasini, Erica M.		
Differential signatures of protective adaptive immunity were identified in a P. cynomolgi-rhesus macaque vaccination model for P. vivax malaria.		153
Pazicky, Samuel		
Uncovering Plasmodium biology by thermal proteome profiling		154
Pina-Leblanc, Celeste		
Unique mitochondrial complex assembly in pyrethroid-resistant anopheles gambiae has implications for vector control.		155
Ploeger, Ellen		
Development of stable DiCre lines in Plasmodium cynomolgi to enable studies of liver dormancy		156
Portet, Anaïs	Presenter: Gomes, Ana	
Defining the plasmodium falciparum replisome by a two-bait proteomics strategy		157
Prakash, Neha		
Disruption of mitochondrial protease PfMPPβ triggers organelle dysfunction and cell cycle arrest in Plasmodium falciparum		158
Prata, Isadora		
The Plasmodium falciparum female development protein 3 (PFD3) is an ApiAP2 transcription factor critical for gametocyte maturation		159
Qasem, Alia	Presenter: Florentin, Anat	
A fundamental barrier to apicoplast gene transfer in malaria parasites		160
Radhakrishnan, Kirthana		
Conservation of erythrocyte calcium signalling in Plasmodium invasion		161

Ratkeviciute-Cooper, Giedre	Presenter: Mishra, Akancha; Ratkeviciute-Cooper, Giedre	
GAPMs form a heterotrimeric complex bridging the gliding machinery and the cytoskeleton across Plasmodium species		162
Rawat, Mukul		
Resistance to PfGCN5-inhibitor L45 involves a novel mitochondrial carrier protein in Plasmodium falciparum		163
Ray, Ananya	Presenter: Garten, Matthias	
Protein targeting mechanisms at the interface of Plasmodium and its host-red blood cell		164
Reda, Abeba		
Temporal dynamics of Plasmodium falciparum population in Metehara, south-central Ethiopia		165
Robert-Paganin, Julien		
Slow but strong: Plasmodium falciparum myosin B at work		166
Rodrigues, Ana		
Running for protection: the role of cell traversal in the establishment of sterile protection against plasmodium		167
Romero, Tais		
Virtual screening and experimental validation of Plasmodium falciparum GNA1 inhibitors as antiplasmodial agents		168
Ronge, Celina		
Molecular analysis of dhfr and dhps mutations associated with sulfadoxine-pyrimethamine resistance in plasmodium falciparum		169
Rossi Mendes, Giovana		
Evaluation of a synthetic monocyclic guanidine derivative with promising in vitro antiplasmodial properties		170
Roumegous, Chloé		
Tubulin polyglutamylaton in Plasmodium berghei		171
Salvi, Anagha Rajesh	Presenter: Ramaprasad, Abhinay	
The essential functions of rhomboid proteases in asexual blood stage malaria parasites		172

Sarrasin, Véronique	Presenter: Coppée, Romain	173
Evolution and determinants of malaria parasites associated with atovaquone-proguanil resistance		
Cancelled		174
Sarrazin, Louis		175
Redefining the role of HDP in Plasmodium falciparum: from hemozoin formation to mitochondrial protein synthesis		
Schmid, Melanie		176
Malaria outcome is modulated by gut microbiota-driven immunity		
Schön, Leonie		177
A leucine-rich repeat protein is critical for nuclear microtubule dynamics in Plasmodium falciparum		
Sengupta, Moumita		178
Rabconnectin(g) the dots: how chaperone-mediated V-ATPase assembly drives hemoglobin consumption in plasmodium falciparum		
Serrano Duran, Rafael	Presenter: Lopez Farfan, Diana Carolina	179
A deep-ocean Cas9 nuclease for genome editing of the human malaria parasite		
Shahar, Michal		180
Dynamic imaging of organelle biogenesis in Plasmodium falciparum		
Cancelled		181
Cancelled		182

Singhal, Ritwik		
Allelic variation in ap2-g leads to differences in sexual commitment between african and southeast asian strains of P. falciparum		183
Smith, Shannara Eilean		
Older, wiser and less infectious? exploring the impact of mosquito age on Plasmodium transmission		184
Sokolowski-Adams, Yvonne		
Defective nuclear uptake impairs Plasmodium transmission in SFA mutants		185
Sparkes, Penny	Presenter: Delves, Michael	
PfACS-ADP controls mitochondrial activity in plasmodium by an acetate overflow mechanism which regulates mosquito transmission efficiency		186
Srivastava, Akriti		
Leishmania-specific host-immune response defines the establishment of Plasmodium infection in a murine model		187
Tan, Mun Hua	Presenter: Day, Karen	
Marker matters: what are the different parts of the Plasmodium falciparum genome revealing about parasite evolution and population structure?		188
Tenorio Novais, Janaína		
Characterization of the protein encoded by the PBANKA_1459100 gene as a gametogenesis activation receptor in Plasmodium.		189
Cancelled		190
Tewari, Rita		
Aurora-related kinases drive unconventional spindle dynamics and mitosis in the malaria parasite		191
Tichácková, Terezie		
A platform to evaluate the transmission potential of drug-resistant Plasmodium falciparum		192

Torres, Katherine		
Divergent T-cell remodeling distinguishes symptomatic and asymptomatic Plasmodium vivax infection		193
Cancelled		194
Truong, Nguyen Van	Presenter: Han, Eun-Taek	
Selective inhibition of the parasite proteasome overcomes antimalarial drug resistance: in vitro and in vivo evidence across Plasmodium species		195
Cancelled		196
Turan, Gulbuse		
Dose-sparing potential of SMNP-adjuvanted R21 malaria vaccine assessed across multiple mouse strains		197
Cancelled		198
Valette, Sarah		
Characterizing a Plasmodium falciparum gene, Pfsa3, and its mutant correlated with severe malaria presentation in sickle-trait patients		199
Varma, Neelakshi	Presenter: Millar, Scott	
A protein deubiquitinase regulates the nuclear architecture of Plasmodium male gametocytes		200
Veith, Ylva		
From prediction to function: uncovering the roles of sex specific genes of the sexual cell fate in P. falciparum gametocyte development		201

Venugopal, Kannan	
On the molecular origins of malaria transmission: protein-level characterization and quantitative tracking of sexual commitment through conversion	202
Cancelled	203
Verhoef, Julie	
Beyond antigenicity: redefining the TRAg protein family in <i>P. knowlesi</i>	204
Cancelled	205
Visone, Joseph	Presenter: Florini, Francesca
The right var at the right time: epigenetic and lncRNA control of antigenic variation	206
Vivar Morón, Arabela	
Establishing a fluorescence-guided single oocyst encapsulation workflow for single cell transcriptomics and genomics	207
Vuillermet, Loïc	
A computational approach to identify conserved protein domains across apicomplexan parasites for the development of pan-phylum therapeutic strategies.	208
Walz, Kevin	
Stick or slip: the uniquely structured αTSR domain of CSP fine-tunes substrate selective adhesion in sporozoites	209
Whitehead, Joe	
A polymorphic family of Plasmodium surface proteins binds and co-recruits leukocyte cell-surface receptors	210
Wilhelm, Olivia	
Spying on Plasmodium: investigating delayed death by apicoplast inhibition	211

Xiao, Xiao		
Molecular basis for the role of Ripr in the invasion of human erythrocytes by Plasmodium falciparum merozoites		212
Yong, James		
Red blood cell invasion as a druggable space against Plasmodium falciparum		213
Zadow, Meghan		
Complementary proteomics approaches for identification of interacting partners and function of the Plasmodium falciparum regulatory protein Alba4		214
Zhao, Hanqing		
Identification and validation of B cell epitopes within serological markers for detecting recent Plasmodium vivax infection in malaria surveillance		215
Zhou, Yunyue		
Nanobody targeting of the Plasmodium falciparum Pfs230-Pfs48/45 fertilisation complex blocks malaria transmission in gene drive-modified Anopheles gambiae		216
