

Akçay, Vuşlat	
Loss of TBR2 disrupts neuronal migration and alters unipolar brush cell identity in early cerebellum development	42
Atasavum, Zeynep Tansu	
Long-term environmental enrichment reshapes the hippocampal chromatin landscape through targeted refinement of distal regulatory elements	43
Bala, Punam	
SWI/SNF ATPase Brahma and Notch signalling collaborate with CBP/p300 to regulate neural stem cell apoptosis in Drosophila larval CNS	44
Bertocchi, Uri	
Psilocybin-mediated DNA methylation as a mechanism for neuroplasticity and sustained antidepressant effects	45
Bhosale, Kedar	
Elucidating the Molecular Mechanisms Underlying Kabuki Syndrome Type 1 Using iPSC-Derived Neuronal Models	46
Bonn, Lena	
Epigenetic regulation of neurodevelopment by BAF chromatin remodeling complexes	47
Bosis, Kelly	
Stress-induced formation of DNA double strand breaks in neurons is linked to molecular adaptations in the prefrontal cortex and hippocampus	48
Bot, Erik	
NeuRoDev resolves temporal and cellular variation during lifelong human cortical development and contextualizes experimental models	49
Brahmendra Barathi, Bhargavi	
Characterizing the functional impact of germline-inherited risk allele rs7572263 in glioma evolution	50

EMBO Workshop: Brain (epi)genome

Buonaiuto, Michela	Presenter: Karimi Goahri, Atieh	
Histone H4 lysine 20 monomethylation regulates p62/SQSTM1 expression via KMT5a and p53 in glioblastoma cells		51
Camargo, João	Presenter: Bumiller Bini Hoch, Valeria	
OLFM4 polymorphism is associated with reduced risk for depression in the South Brazilian Mennonite population		52
Canalli Kretzschmar, Gabriela	Presenter: Boldt, Angelica B. W.	
(Epi)genetic founder effect for depression related to brain development and function in Mennonites		53
Collins, Sarah	Presenter: Alghoul, Emile	
Endogenous DNA double strand breaks define a new class of transcription regulatory elements.		54
Colombo, Lara		
Systematic comparative analysis of 3D genome structure between neuronal and clinically accessible tissues highlights tissue-specific chromatin features at disease loci		55
de Boer, Fleur		
Mapping the epigenetic landscape of multiple sclerosis in human and experimental mouse models		56
Deelen, Laura		
Investigating the epigenetic control of human neurodevelopment by human-specific transposable elements using CRISPRi		57
Escarrabill Illa, Júlia	Presenter: Brookes, Emily	
Human-specific regulation of BDNF by enhancers, MECP2, and genome architecture		58
Espina, Jose Ezekiel		
H3K27m3 mediates control of network excitability in early epilepsy disease progression		59
Eve, Thomas		
Deciphering intercellular interactions of neurotoxic radial glia in progressive multiple sclerosis		60

Felipe Cordero, Daniel	
Isoform-specific roles of chd2 in human cortical neurogenesis	61
Feng, Ruoqing	
Single-cell spatial transcriptomic profiling defines a pathogenic inflammatory niche in chronic active multiple sclerosis lesions	62
Ghasemi, Sadegh	
A human iPSC-based model to study microglia–neuron interactions in neurodevelopmental disorders	63
Giannopoulou, Angeliki-Ioanna	
Pharmacological inhibition of suv4-20h2-mediated h4k20me3 induces mitotic stress, apoptosis and suppresses invasion in pediatric astrocytomas	64
Green, Sarah	
Dissecting the molecular mechanisms of a human developmental disease using neuronal cell culture models and multiomics	65
Hart, Shmuel	
Tissue-specific cfDNA methylation reveals concurrent neuro-glial injury and broad immune activation in schizophrenia	66
Heczko, Samuel	
Epigenetic mechanisms of Pax6 induced neuronal cell fate control	67
Hilberer, Lisa	
Epigenetic regulation of human cortical neurogenesis by HERV-derived LTR5 elements	68
Hoof, Vivien	
Loss of epigenetic adaptation to a high-fat diet in alpha-synuclein transgenic mice	69
Hussain, Jazib	
Chromatin regulation of replication stress responses during human neurodevelopment	70

Ito, Kaho	
Activity-dependent chromatin memory defines cell-type-specific secondary response genes in engram neurons	71
Jha, Pawan	
macroH2A mediates epigenetic priming of BDNF-dependent transcription in cortical neurons	72
Kamand, Morad	
High-resolution epigenomic profiling of 16p11.2 CNVs in region-specific brain organoids using multimodal single-cell nanoCUT&Tag	73
Karayol, Remzi	
MSL2 regulates dynamic gene expression and cell-state transitions during human neurodevelopment	74
Kentro, James	
Mapping transcriptional and epigenetic environments in adversity and depression	75
Kesar, Devishi	
Deciphering pediatric glioma subtypes: super-enhancer dynamics and (epi)genomic insights into cell of origin	76
Korneeva, Lisa	
Heterochromatin regulation in mammalian olfactory sensory neurons	77
Kretschmer, Miriam	
Glucocorticoid exposure drives glial fates during neurodevelopment via NFI transcription factor family regulation	78
Kuang, Mohuizi	Presenter: Kuang, Mohuizi; Shields, Emily
3D epigenome characterization of the adult ant brain reveals enhanced promoter connectivity at genes of the reproductive caste	79
Kuester, Karolin	
Disease modelling of Weaver syndrome in human cortical organoids	80

Kurrikoff, Pille-Riin Stress-sensitivity of the epigenome of the estrogen-receptor positive insular connectome	81
Leimbacher, Sebastian Regulatory dynamics of neurodevelopmental disease genes during early neural progenitor cell differentiation.	82
Cancelled	83
Lejon, Camille Unravelling the role of NIPBL in the development and function of cortical interneurons	84
Lugenbühl, Justina Identification of DNA methylation-dependent functional regulatory elements in developing brain cells using massively parallel reporter assay	85
Lynch, Connor Competitive inhibition by Sp9 and Dlx transcription factor co-binding balances production of D1 and D2 medium spiny neurons	86
Lyons, Camilla Finding determinism in the stochastic olfactory receptor gene choice	87
Madapura, Pradeepa BRD4 represses developmental and neuronal genes through interactions with polycomb repressor complex	88
Magnúsdóttir, Kristín Hekla Dynamic changes in hippocampal neuronal networks during epileptogenesis in rat via multiplex mRNA detection	89
Martinez, Marcelo IMPACT of excessive ethanol intake on cerebellar inflammation in aged UChB rats	90

EMBO Workshop: Brain (epi)genome

Mokhtarzadeh Azar, Kasra	
Pharmacological inhibition of DOT1L's enzymatic activity accelerates neural differentiation by modulating signaling pathways	91
Morato Gomez, Lucia	
Enhancer hijacking as the cause of adult-onset demyelinating leukodystrophy	92
Morgan, Sophie	
Modelling Brpf1-associated neurodevelopmental disorders in mice and trialling treatments	93
Noureldin, Jumana	
Mapping epigenetic-associated long non-coding RNA landscapes in pediatric glioblastoma	94
Nozaki-Nakamura, Yuka	
A mechanism underlying BDNF-dependent long-term changes in gene expression in hippocampal neurons	95
Ong, Agnes Lee Chen	
The role of ZNF638 in epigenetic and post-transcriptional regulation of intronic retroelements in human neural progenitor cells	96
Orozco, Alister	
The influence of Sox2 on inhibitory neuron fate-determination during mouse embryonic development	97
Papleka, Arteda	
Potentiating LSD1 via ASO-mediated exon skipping: an epigenetic approach to study fear memory	98
Park, Na Hyun	
Trans-histone crosstalk-mediated establishment of mutually exclusive H3K79 methylation zones	99

Pérez-Salvador, Núria	Presenter: Griñán-Ferré, Christian	
G9a inhibition by FLAV-27 restores synaptic function and reduces mitochondrial stress in BTBR mice: An integrated multi-omics analysis of transcriptional, epigenetic, and spatial signatures in autism spectrum disorder		100
Rajado, Ana Teresa		
Investigating epigenetic contributions to clinical variability in spinocerebellar ataxia type 2		101
Ramisch, Anna		
Deciphering Parkinson's disease progression through single-cell epigenomics in live brain tissue		102
Reichard, Julia	Presenter: Wolff, Philip	
DNMT1-mediated epigenetic control of interneuron migration and fate orchestrates cortical neurogenesis, architecture, and function		103
Romain, Hacquet		
Long lasting DNA methylation changes following ayahuasca use in healthy human volunteers		104
Romero, Esli		
Role of LINE-1 transposable elements in early neural differentiation		105
Roy, Aiendrilla		
Ethological behavior as a framework for probing the mechanisms of early cognitive decline		106
