

Adam, Abdulrahman Idoko		
Developing an experimental system for investigating parasite-IgE interactions		32
Adams, Yvonne		
Brain Barriers: Cerebral Malaria and the Choroid Plexus		33
Aheto, Justice Moses Kwaku		
Mapping under-five child malaria risk that accounts for environmental and climatic factors to aid malaria preventive and control efforts in Ghana: Bayesian geospatial and interactive web-based mapping methods		34
Alder, Arne	Presenter: Matz, Joachim Michael	
The role of Plasmodium V-ATPase in vacuolar physiology and antimalarial drug uptake		35
Alvarado Valverde, Jesús		
Comparative analysis of motif-mediated protein-protein interactions among Plasmodium species		36
Ambekar, Sushma	Presenter: Absalon, Sabrina	
Peering into the pore: Ultrastructure expansion microscopy reveals the landscape of nucleoporins during intraerythrocytic proliferation of rodent malaria parasites.		37
Anaguano-Pillajo, David		
Plasmodium falciparum requires two rhoptries to invade host red blood cells		38
Angage, Dimuthu		
Pan-species specific anti-AMA1 i-body potently inhibits invasion of host cells by both liver and blood stages of Plasmodium		39
Araki, Tamasa	Presenter: Annoura, Takeshi	
Transgenic Plasmodium cynomolgi reporter line expressing GFP-Luciferase to track liver-stage growth and dormancy		40
Assaraf, shany		
The uORF regulating pregnancy malaria encodes for a novel protein involved in ER Stress Response.		41

Atchou, Kodzo		
Expansion microscopy reveals microtubule dynamics during the liver stage development of Plasmodium berghei and confirms lysosome fusion with the parasitophorous vacuole membrane.		42
Baptista, Vitória		
Targeting the unresolved Plasmodium falciparum hemozoin synthesis pathway		43
Böhme, Ulrike		
Resources for malaria researchers at the Eukaryotic Pathogen, Vector and Host Informatics Resources (VEuPathDB.org)		44
Bolscher, Judith	Presenter: Bezemer, Bodine	
Improved P. falciparum liver stage drug screening using serum-free B27-SB431542 medium		45
Bouzón-Arnáiz, Inés	Presenter: Fernández-Busquets, Xavier	
Protein aggregation in the malaria parasite: What for?		46
Bozdech, Zbynek		
The artemisinin-induced dormant/persister stages of Plasmodium falciparum exhibit hallmarks of cellular senescence and drug resilience		47
Bravo, Patricia		
Pfmdr1 gene contributes to the mechanism of resistance of hydroxy-benzanilides class in Plasmodium falciparum		48
Bulloch, Michaela		
Doxycycline inhibits both apicoplast and mitochondrial translation in Plasmodium falciparum		49
Bulloch, Michaela		
Doxycycline inhibits both apicoplast and mitochondrial translation in Plasmodium falciparum		50
Calit, Juliana	Presenter: Bargieri, Daniel	
Novel transmission blocking antimalarials identified through high-throughput screen of Plasmodium berghei Ookluc		51

Carruthers, Lauren	
Characterisation of the Apicomplexa-specific zinc-finger protein (ZINGER) family in Plasmodium	52
Castellano, Casilda	
The genetic landscape of origins of replication in Plasmodium falciparum.	53
Castro Pena, Carolina	
The phosphatase UIS2 is needed for protein export in malaria parasites	54
Chmielewski, Jill	
Functional and immunological characterisation of merozoite surface proteins 4 and 5 in Plasmodium knowlesi	55
Christiane, Donkeu	
Immunolocalization and functional characterization of PFE1445C: a novel integrin alpha-like cell adhesion protein in Plasmodium falciparum	56
CIARDO, MARIAGRAZIA	
DEVELOPMENT OF MOLECULAR ASSAYS ON PLASMODIUM FALCIPARUM GAMETOCYTES FOR FUNCTIONAL ANALYSIS AND NOVEL DIAGNOSTICS ON MALARIA PARASITE TRANSMISSION	57
Couple, Justine	
Investigating Plasmodium falciparum genome conformation at a nucleosomal resolution	58
Cox, Mimi	
Transcriptional responses to early Plasmodium falciparum infection by two Anopheles species.	59
Crispim, Marcell	
Identification of a novel isoprenoid salvage pathway in Plasmodium falciparum	60
Cronshagen, Jakob	
SLI-based activation of specific var genes provides versatile tools to study PfEMP1	61

Dao, Francois	
Unraveling intraerythrocytic development and molecular mechanisms of RBCs invasion in Plasmodium malariae	62
Deb, Bijayeeta	
What genetic factors in humans contribute to malaria severity?	63
Deora, Nimita	
Interspecies interactions in Plasmodia mixed infections: putting the first step forward	64
Deora, Nimita	
Mixed approaches to address Plasmodium mixed infections	65
CANCELLED	66
Diaz Terenti, Barbara	
Alternative splicing and its regulation in the malaria vector Anopheles gambiae, an assessment of different tissues and infection status	67
Dietrich, Melanie H.	
Blocking interactions of Plasmodium falciparum 6-cysteine proteins using inhibitory nanobodies	68
Dollon, Jacques	
Circulation of Anopheles gambiae complex and malaria transmission during the dry season in Djoumouna and Ntoula villages, Republic of Congo	69
Donsante, Samantha	Presenter: Siciliano, Giulia
An in vivo humanized model to study homing and sequestration of Plasmodium falciparum transmission stages in the bone marrow	70
DonVito, Sophia	
Reticulocyte binding-like proteins as potential vaccine targets for Plasmodium knowlesi and Plasmodium vivax	71

Dooley, Nick		
Activation of cytotoxic vd2 gamma-delta T cells during primary Plasmodium falciparum infection		72
Duarte Júnior, José Wandilson Barboza		
Co-infection with Mayaro virus prevents Plasmodium berghei ANKA-induced neuropathology and lung injury		73
Farhat, Dayana	Presenter: Vignolini, Tiziano	
m6A-mediated translational regulation during Plasmodium falciparum gametocytogenesis		74
Frangos, Sophia		
Implementation of deep-learning image segmentation to study KAHRP export kinetics throughout the intraerythrocytic life cycle of P. falciparum		75
Fürle, Kristin	Presenter: Thomson Luque, Richard	
Immunization with the Plasmodium falciparum full-length MSP1 malaria vaccine candidate SumayaVac-1 elicits multifunctional IgMs		76
Galloway, Lauren		
Unravelling the nature of three distinct Plasmodium falciparum schizont populations		77
Gancheva, Maria	Presenter: Wilson, Danny W.	
Host-directed therapy for malaria: Host cell signalome as a target		78
Geoghegan, Vincent		
Exploring the diversity of hypervariable RIFINs and their interactions with human immunomodulatory receptors		79
Gibbins, Matthew		
Imaging Plasmodium berghei gametocytes in the skin of mice		80
Guttery, David		
Meiosis in Plasmodium: how does it work?		81
He, Buyuan		
Towards a Plasmodium 3D cell atlas		82

Hentzschel, Franziska	
Two flagellar proteins stabilise axonemal doublet microtubules to enable motility of Plasmodium male gametes.	83
Höppner, Yannick Daniel	
Impact of longitudinally acquired host immunity on P. falciparum var gene expression	84
Ibrahim, Amy	
From genome to function: The first global genomic analysis of P. malariae parasites provides evidence of pyrimethamine resistance	85
Imamu, Mudessir Temam	
The biology and pathology of the malaria parasite in the Case of Ethiopia	86
Inklaar, Maartje	
Two new Pfs230 domains as a target for transmission-blocking antibodies	87
Izrael, Richard	
Role of a base modification in the antigenic variation of Plasmodium falciparum parasites	88
Jalovecka, Marie	
Functional Analysis of Babesia divergens Calcium-Dependent Protein Kinases	89
Jones, David	
Febrile heat stress increases phosphorylation and expedites trafficking of P. falciparum's host-exported proteins	90
JORELLE ANGE, TCHAKOUNTE	
Understanding the intra-host dynamics of Plasmodium falciparum infections with amplicon sequencing	91
Kanyal, Abhishek	Presenter: Yang, Annie S. P.
Home sweet home: dissecting host-pathways essential for effective Plasmodium falciparum infection in primary human hepatocytes	92

Kaur, Davinder		
Detection of Single Nucleotide Polymorphism in Chloroquine resistant Pvmdr-1 and Pfcr1 genes of P. vivax and P.falciparum clinical isolates by using Loop Mediated Isothermal Amplification		93
Kiper, Edo		
Antimicrobial peptides with ability to target the malaria-causing Plasmodium falciparum		94
KIWENDO, RONALD	Presenter: KIWENDO, RONALD	
Combating Malaria Scourge Using God Given Pharmacy (Natural Plants/Flowers) a Case Study of Uganda		95
Kobayashi, Yukino		
Contribution of Actin-like proteins Alp1 and Alp2b in Plasmodium progression		96
Kok, Michelle		
Development of a screening toolkit for antimalarial mode-of-action determination in gametocytes		97
Kuehnel, Ronja	Presenter: Brochet, Mathieu	
A Plasmodium membrane receptor platform integrates cues for egress and invasion in blood forms and activation of transmission stages		98
Kumari, Jyoti		
'Erythritol', safe sugar alcohol exhibits multi-stage anti-malarial activity by permeating through the Plasmodium falciparum aquaglyceroporin channel		99
Lees, Rebecca		
Role of the merozoite surface protein 1 (MSP1) complex in P. falciparum egress from erythrocytes		101
Levytska, Viktoriya		
Efficient Iron Uptake via a Reductive Mechanism in Babesia divergens		102

Ling, Dawson	Presenter: Bullen, Hayley	
A pyridyl-furan series developed from Merck's Open Global Health Library blocks red blood cell invasion and protein trafficking in Plasmodium falciparum through potential inhibition of the parasite's PI4KIIIb enzyme.		103
Ling, Dawson		
MMV687794 impairs blood-stage Plasmodium falciparum invasion by targeting a putative lysophospholipase in the rhoptries		104
Loesbanluechai, Duangkamon		
Interrogating genetic determinants of P. falciparum vector transmission		105
Lol, Juan C		
Insecticide resistance in the Neotropical mosquito Anopheles albimanus, a key malaria vector in Central America		106
Lopez Farfan, Diana Carolina		
Exploring SARS-CoV-2 and Plasmodium falciparum coinfection in human erythrocytes		108
Lopez Farfan, Diana Carolina	Presenter: Parres-Mercader, Marina	
Prevalence of SARS-CoV-2 and co-infection with malaria during the first wave of the pandemic (the Burkina Faso case)		109
López, Celia		
Identification of parasite killing kinetics using an in vitro parasite viability assay based on imaging readout		107
Ludivine, Royer		
The phosphodiesterase inhibitor Tadalafil impacts the mechanical properties of Plasmodium falciparum ring stages-infected red blood cells		110
Luo, Peiyuan		
Investigate the mode of action for bis-1,2,4-triazines, a novel class of antimalarial		111
Lyons, Frankie		
Nanobodies targeting malaria transmission-blocking candidate		112

Maixner, Frank	Presenter: Kilian, Nicole	
Microscopic evidence for malaria infection in viscera tissue of the Medici family		113
Malhotra, Rashim		
Investigating the role of antisense transcription mediated gene regulation in Plasmodium falciparum		114
Martinez, Francisco		
Identification of immune correlates that are associated with protection against Plasmodium vivax blood stage challenge following immunization with recombinant PvDBP II		115
MATHIS, Emilie		
The role of phosphorylation in Plasmodium falciparum cell cycle arrest		116
Michie, Kyle		
Exploring the role of PfAAT1 in the emergence of Plasmodium falciparum Chloroquine Resistance in Colombia		117
CANCELLED		118
Murai, Shunsuke		
Protective efficacy of viral-vectored P. falciparum vaccine against mutated parasites in a murine model		119
Muteru, Kelvin		
Dual host-pathogen transcriptome analysis during asymptomatic and symptomatic malaria infections		120
Nalubega, Mayimuna		
Age-dependent differences in composition and maintenance of malaria antigen-specific CD4 T cells		121
Nayak, Bandita		
Indispensability of protein neddylation for transmission of Plasmodium berghei from mammalian host to mosquito vector		122

Nayak, Bandita		
Indispensability of protein neddylation for transmission of Plasmodium berghei from mammalian host to mosquito vector		123
Ngotho, Priscilla	Presenter: Peedell, Megan	
Elucidating the dynamics of surface antigen expression during gametocyte maturation		124
Nguyen, Tra		
Resistance to Ivermectin in Plasmodium falciparum		125
Nguyen, Tra		
Resistance to Ivermectin in Plasmodium falciparum		126
NHIM, Sandra		
Heterochromatin changes during the initial steps of Plasmodium falciparum gametocytogenesis		127
Nikolova, Vella		
A pharmacological inhibitor of glucose-6-phosphate dehydrogenase (G6PD) to interfere with the propagation of Plasmodium falciparum		128
Nyarko, Prince		
Plasmodium falciparum genomes and transcriptomes from asymptomatic chronic infections in The Gambia – a longitudinal cohort study		129
Okafor, Adaobi		
In silico analysis of regulatory elements of Plasmodium berghei stage-specific genes		130
Olaniyan, Niniola		
Developing PfCLK1 as a potential antimalarial drug target		131
Opadokun, Tosin	Presenter: Rohrbach, Petra	
Proteomic analysis of stage specific Plasmodium falciparum-infected RBC extracellular vesicles reveals distinct profiles		132

Ortega, Diana Carolina		
Correlation and ancestral reconstruction for the allele frequencies of two malaria resistance mutations in human populations		133
Osman, Tasneem		
Management of Invasive American weed Parthenium hysterophorus could prevent spread of mosquitoes borne diseases		134
Otoboh, Stanley		
Genetic validation of the function of PfEMP1 in Plasmodium falciparum rosette formation using CRISPR-Cas9 genome editing.		135
Paonessa, Giacomo	Presenter: Siciliano, Giulia	
Gametocyte-specific and all-blood-stage transmission-blocking chemotypes discovered from high throughput screening on Plasmodium falciparum gametocytes		136
Pazicky, Samuel		
Explorations of P. falciparum complexome for future antimalaria drug discoveries		137
Pérez Cantero, Alba		
De novo heterochromatin nucleation and maintenance in Plasmodium falciparum		138
Piel, Laura	Presenter: Santos, Joana	
Transcriptional regulation during switching of invasion pathways by P. falciparum		139
Pilate, Kwi		
Mosquito diversity and behavioral activity of Anopheles species across different altitudes and seasons along the slopes of mount Cameroon		140
Plastina Astro, Thafne		
TRANSCRIPTIONAL CONTROL OF PLASMODIUM KNOWLESII IN RESPONSE TO STRESS		141

Plutowski, Laura	
An experimental tool to study exportin-1-dependent nuclear export in Plasmodium falciparum	142
Pradhan, Sabyasachi	
Factors favouring successful adaptation of P. falciparum to in vitro culture	143
Preira, Claude Marie François	
Role of the oocyst rupture protein complex in the rupture of the Plasmodium oocyst	144
Rajendran, Vinoth	
A Cationic lipid Stearylamine Displays Fast-acting Antimalarial Activity Against Blood-stage Forms of Plasmodium falciparum in Culture	145
Ramaprasad, Abhinay	
SHIFTiKO – a scalable inducible gene knockout system for Plasmodium falciparum	146
Ramon Zamorano, Gala	
The protein landscape of the chromatin states in P. falciparum parasites	147
Rashpa, Ravish	
The Skp1-Cullin1-FBXO1 complex is a pleiotropic regulator required for the formation of gametes and motile forms in Plasmodium berghei	148
Reyes, Raphael	Presenter: Bunnik, Evelien M.
Broadly reactive antibodies can inhibit the binding of PfEMP1 to the endothelial receptor EPCR	149
Ribot, Nathan	
A novel type of asexual multiplication of Plasmodium oocysts?	150
Rumaisha, Rumaisha	
Chaperonin activity of Plasmodium prefoldin complex is essential to guard proteotoxic stress response and presents a new target for drug discovery	151

Schepis, Antonino	Presenter: Kappe, Stefan	
IFN-gamma Eliminates Plasmodium Liver Stages Via Non-Canonical Autophagy		152
Schmitz, Yasmin		
Plasmodium falciparum ATG18 and FCP as potential regulators of food vacuole membrane dynamics		153
Seefeldt, Leonie		
Imaging-based quantification of P. falciparum invasion into genetically modified erythroid host cells		154
Serrano-Durán, Rafael		
A novel CRISPR approach to study essential gene function across the human malaria parasite life cycle		155
Sharma, Manish		
Exploring the biochemical and functional role of malaria parasite Raf kinase inhibitor protein (PfRKIP).		156
Sheokand, Pradeep Kumar		
Function, structure and mode of inhibition of the Atovaquone target complex III in Plasmodium falciparum and Toxoplasma gondii		157
Shibu, Mohini Anjna		
Role of PHIST protein in knob formation		158
Siau, Anthony	Presenter: Preiser, Peter R.	
Comparative Spatial proteomics of Plasmodium infected erythrocytes		159
Siddiqui, Ghizal	Presenter: Creek, Darren J	
Cellular resistance to artemisinin is associated with decreased artemisinin activation and increased glutathione levels in Plasmodium falciparum		160
SINGH, POOJA		
Elucidating the roles of host transcription factors in malaria liver stage parasite development		161

Singla, Shamit	
Imaging cerli1 and 2 interacting partners during Plasmodium falciparum merozoite development.	162
Sinha, Abhinav	
Sulfadoxine-pyrimethamine drug resistance markers hint malaria drug policy shift in India	163
Skorokhod, Oleksii A.	
Cytochrome CYP4F1 and 4-hydroxynonenal conjugation in malaria pigment hemozoin-fed monocytes inhibits ω-hydroxylation of OH-PUFAs	164
Sparkes, Penny	
Is mitochondrial respiration essential for male gametogenesis in P falciparum?	165
Steel, Ryan W. J.	Presenter: Boddey, Justin A.
Sporozoite infection and drug treatment with a novel plasmepsin IX/X inhibitor arrests liver merozoites and confers sterile immunity to malaria	166
Stürmer, Vanessa	
Progeny Counter Mechanism in Malaria Parasites is linked to extracellular Resources	167
Suarez Cortes, Pablo	
PfGEST is a conserved protein involved in the release of secretory organelles of P. falciparum transmissible stages.	168
Tavella, Tatyana	
Characterization of erythroblast infection by Plasmodium falciparum	169
Tchongwe Divala, Lizzie Bridget	
Elucidating a putative role of PfNT1 in malaria transmission	170
Theodoridis, Liana	
Investigating the antimalarial activity of novel heterospirocyclic compounds in P. falciparum parasites	171

Theodoridis, Liana		
Investigating the antimalarial activity of novel heterospirocyclic compounds in <i>P. falciparum</i> parasites		172
Thomas, James		
Unravelling the role of the apical membrane antigen-1 cytoplasmic domain during <i>Plasmodium</i> merozoite invasion of erythrocytes		173
Thommen, Basil		
FKBP35 secures ribosome homeostasis in <i>Plasmodium falciparum</i>		174
Tiwari, Aparna	Presenter: Sinha, Abhinav	
Severe malaria and risk of hypertension in India – an evolutionary connection?		175
Toth, Veronika		
Mutational analysis of <i>Plasmodium falciparum</i> vacuolar iron transporter PfVIT uncovers potential mechanisms that regulate its function		176
Ubiaru, Prince		
Genetics of the interaction between <i>Plasmodium falciparum</i> and <i>Anopheles albimanus</i>		177
Varma, Neelakshi		
Dynamic protein ubiquitination by USP1 is essential for malaria transmission		178
Verdaguer, Ignasi		
Ubiquinone biosynthesis inhibition in malaria parasites		179
Vieira, Taís	Presenter: Moraes Barros, Roberto	
MOLECULAR CHARACTERIZATION OF <i>PLASMODIUM FALCIPARUM</i> AND <i>PLASMODIUM KNOWLESII</i> GAMETOCYTES USING SINGLE CELL RNA SEQUENCING		180
Villegas, Alejandra		
Breaking out: egress of malaria parasites requires a putative glycosyltransferase		181

Viola, Cristina	
Towards the structural characterisation of an immunoregulatory interaction in <i>Plasmodium vivax</i> malaria	182
Votborg-Novél, Lasse	
Single cell transcriptional profiling of dry and wet season <i>Plasmodium falciparum</i>	183
Walz, Annabelle	
In vivo testing of <i>Artemisia afra</i> for antimalarial activity	184
Whitehead, Joe	
Investigating the immunoregulatory role of the <i>Plasmodium vivax</i> VIR family	185
Wirjanata, Grennady	
Identification of an inhibitory pocket in falcilysin bound by clinically relevant drugs and novel compounds provides a new avenue for malaria drug development	186
Yamamoto, Yutaro	
<i>P. falciparum</i> – <i>P.vivax</i> bivalent vaccine development using LC16m8Δ/AAV viral vectors platform	187
