

Atieh, Youmna Scaling organ size to metabolism during development	36
Bahety, Devesh Energy and redox metabolism in primordial oocytes	37
Bocan, Václav The thermodynamic toolbox: understanding cellular metabolism quantitatively	38
Bondarenko, Vladyslav Ex utero stem cell-derived model of the human post-implantation embryo development	39
Briere, Jonathan Synchronous metabolic and epigenetic reprogramming in secretory cells: a two-pronged regulatory mechanism	40
Crespo-González, Ariadna Impact of CoQ deficiency on embryonic development in zebrafish	41
Presenter: Brea-Calvo, Gloria	
Elsafadi, Sara Characterizing the metabolic landscape of the European roe deer (<i>Capreolus capreolus</i>) uterine fluid during embryonic diapause and at elongation	42
Hahn, Elisa Lilli Examining the role of metabolic heterogeneity in cell fate specification	43
Hanna, Salim Rediscovering SUCNR1 in zebrafish — a succinate sensor of metabolic stress during development	44
Heidarian, Yasaman The <i>Drosophila</i> gene <i>sima/Hif1alpha</i> is an essential regulator of the larval glycolytic program	45
Presenter: Tennessen, Jason	
Heinemann Yerushalmi, Lia Metabolic regulation of cell cleavage during early embryogenesis	46

Hosny, Mona	
A novel mouse model to study the impact of mitochondrial dysfunction on early embryo development	47
Hwang, Min Hee	
Improvement of dyslipidemic of Smilax sieboldii extract in C57BL/6 mice fed a high-carbohydrate diet	48
Ilker, Efe	
Bioenergetic costs and the evolution of noise regulation by microRNAs	49
Iuso, Domenico	
Nucleoside Diphosphate Kinases 1 and 2 regulate a protective liver response to a high-fat diet	50
Kafkia, Eleni	
Global changes, discrete outcomes: uncovering mechanisms of specificity in the metabolic regulation of the epigenome during early embryo development	51
Lania, Gabriella	
Tbx1 haploinsufficiency alters mitochondrial function during embryonic development	52
Laxhuber, Kathrin	
Spatial organization and energetics of cell metabolism	53
Lefranc, Clara	
Drosophila juvenile growth spurt coincides with an intestinal metabolic switch	54
Madan, Somya	
Drp1 mediates progression to gastrulation in Drosophila embryos by regulating mitochondrial dynamics	55
Moncada, Margherita	
ATP-Citrate Lyase, a key metabolic player in sheep blastocyst development	56

Pladevall-Morera, David		
Unravelling the coupling of metabolism to chromatin states at implantation		57
Rada, Jona		
Linking metabolic state to signaling during mouse embryonic development		58
Rani, Garima		
Entropic insights on emerging traits from growing bacterial colonies		59
Rebelo, Ana Rita		
The neighbours matter: metabolic support of neural stem cell-derived brain tumors in <i>Drosophila melanogaster</i>		60
Rout, Debashis	Presenter: Megha, Megha	
Digestive enzyme activities of adult <i>Drosophila</i> exposed to larval nutritional stress		61
Sarkar, Sudipta		
Composition and size of Lipid droplets in zebrafish embryos are governed by local polarity of yolk domains in yolk-blastodisc interface		62
Schmeisser, Kathrin		
Quantifying the energetics of development, quiescence, and death		63
Stark, Paul		
Quantification of mitochondrial architecture in zebrafish development		64
Sudhakar, Krittika		
The effect of maternal diet on offspring phenotypes		65
Tian, Xin	Presenter: Doerner, Peter	
Phosphate nutritional status modulates <i>Arabidopsis</i> root apical stem cell maintenance via the RGF1-PLT2 regulatory network by direct metabolic control		66

Veits, Nisha

Upon ETC perturbations NAD levels limit the speed of the differentiation front in the fly eye 67

Villaronga Luque, Alba

Integration of Molecular and Phenotypic Fingerprints Reveals Tuneable Modulators of Stembryo Morphostate 68

Vogel, Tanja

Cross-talking histone methylation prevents progenitor differentiation and neuronal differentiation in cerebral cortex development by limiting Asparagine synthetase expression 69

Yadav, Dipika

Deciphering the role of post-translational modifications of proteome on transcriptomic and metabolic transition during neuronal differentiation 70

Yadav, Vinca

Evolution of early embryonic energetics in animals 71

Zhao, Allan

Effects of well-managed maternal type 1 diabetes on offspring cardiovascular function 72
