Adekunle, Danielle
**Investigating the genome dynamics of early interspecific hybridization**

Ajmera, Shiksha
**Identifying the rules that determine the establishment of metabolic cross-feeding in bacteria**

Alves Menegon, Yasmine
**Adaptive evolution of yeast tolerance to lignocellulosic hydrolysates**

Ameline, Camille
**Influence of the adaptive immune system on the evolution of gut microbiota**

Barreto, Joneclei Alves
**Evolution of Escherichia coli strains DH5α and E2348/69 in minimal medium using sucrose as the sole carbon source**

Bassler, Stefan
**Genomic landscape of resistance evolution**

Bendixsen, Devin
**Genomic (in)stability of interspecific Saccharomyces hybrids**

Cadež, Neža
**Loss-of-heterozygosity and gene copy-number variations in Saccharomyces cerevisiae strain adapted to buckwheat wort**

Chen, John
**Mutational scanning to probe trends and incompatibilities of metallo-β-lactamases**

Ciliberto, Andrea
**Evolutionary dynamics upon microtubules hyper- and de-stabilization: different strategies with similar outcomes**

Cool, Lloyd
**The benefit of being slow – a long lag phase yields a fitness advantage in constant environments**
Cuamatzi Flores, Jorge Luis
**Recurrent catalase duplications increase oxidative stress resistance in Ustilago maydis**

Damaris, Bamu
**A Microbial Genotype-to-phenotype map for transcriptional regulation**

de Bem, Lucas
**ReMaSSing diploid: a protocol based on mass selection and backcrossing for quantitative trait loci mapping of diploid Saccharomyces cerevisiae**

Dutta, Abhishek
**The dynamics of loss of heterozygosity spectra in Saccharomyces cerevisiae**

Erdogan, Ayse
**Neutral drift and threshold selection promotes phenotypic variation in an evolving protein population**

Fink, Justus
**Microbial population dynamics decouple nutrient affinity from environmental concentration**

Fink, Theresa
**Quantifying fitness effects and epistatic interactions of spontaneous antibiotic resistance mutations**

Frickel, Jens
**Presenter: Tawfeeq, Mohammed Characterization of mutational robustness in yeast**

Hartl, Johannes
**Genome-wide identification of natural variants that alter protein levels and drive complex traits**

Hays, Michelle
**Killer yeast: adaptive evolution in a four-party genetic conflict**

Heineike, Benjamin
**Signatures of metabolic heterogeneity in exponentially growing yeast**
Heistinger, Lina
Mating partner selection and species separation in budding yeast

Helsen, Jana
Chromosome fusions lead to cell division defects that can be repaired through evolution

Hülsmann, Matthias
An efficient collective – From individual proteome efficiency to collective community metabolism

Ingelman, Henri
Autotrophic adaptive laboratory evolution of the acetogen Clostridium autoethanogenum delivers a gas-fermenting strain with superior growth, products, and robustness

Jacobus, Ana Paula
Presenter: Gross, Jeferson
Yeast adaptive evolution towards the cellulosic ethanol

Jakobson, Chris
Molecular basis of the epigenetic influence of Hsp90 on natural genetic variation

Jayaraman, Vijay
A complex regulatory paradigm controls the community structure and morphology in a bacterial biofilm

Kahl, Lisa Juliane
Bacterial-fungal co-infections and their role in the evolution of antimicrobial resistance

Klumpe, Heidi
Design principles of robust cellular aggregation

Konovalovas, Aleksandras
The interplay between viral elements in the yeast of the Saccharomyces genus

Kovuri, Purnima
Do ribosomal protein gene polymorphisms drive adaptation?
EMBO Workshop: Molecular mechanisms in evolution and ecology

Lambert, Camille
Sequence space exploration of self-reproducing RNAs 73

Li, Jing
Population bottlenecks under drug selection reveal global footprints of genome instability 74
Presenter: Liti, Gianni

Macaluso, Francesca
Laboratory evolution experiments uncover the emergence of resistance upon microtubule hyper-stabilization 75

McNeilly, Oliver
Understanding the physiological and defence mechanisms of silver nanoparticle resistance in the bacterial pathogen acinetobacter baumannii 76

Mihajlovic, Ljiljana
Gene duplication provides mutational robustness and accelerates evolution 77

Morales, Lucia
Population structure of S. cerevisiae from agave fermentations in Mexico 78

Mozzachiodi, Simone
A genomic introgression drives sexual selection in yeast 79

Muhsal, Linea Katharina
The emergence of a life cycle promotes the evolution of mutualistic cooperation by multilevel selection 80

Mulkern, Adam
Study of the impact of genetic background on the evolution of antimicrobial resistance in E. coli through high-throughput laboratory evolution 81

Nielsen, Lasse
Diversity and evolution of biosynthetic gene clusters 82

Opalek, Monika
Fitness advantage of phenotypic heterogeneity in starving Saccharomyces cerevisiae populations 83
Ozolina, Zane
*Contribution of mitochondrial metabolism to stress resilience phenotype induced by purine starvation in budding yeast* 84

Palkova, Zdena
*Whi2p-Psr1p/Psr2p complex in the evolution of spatially structured yeast populations* 85

Pavlinova, Polina
*Effect of folding on RNA variation by recombinase ribozyme* 86

Plocek, Vitezslav
*A new perspective of the mitochondrial retrograde pathway: How it regulates development of colonies of laboratory strain BY4742 Saccharomyces cerevisiae* 87

Pontes, Ana
*The deep, pre-domestication, ecological roots of the GAL alternative pathway of Saccharomyces cerevisiae* 88

Rai, Manish
*Presenter: Chakraborty, Kausik Adaptive thermotolerance in Escherichia Coli converges on metabolic changes that improve proteostasis* 89

Ruiz, Javier
*Importance of the ecological context in the function of wine yeast communities* 90

Sarkadi, Zsuzsa
*Yeast mating behavior evolves through compensation of harmful mutations* 91

Sobisch, Lydia-Yasmin
*Biocide resistance evolution in sulfate-reducing bacteria mediating microbially influenced corrosion* 92

Sonal, -
*What makes a gene essential?* 93

Tarkington, Jason
*Characterizing Pareto fronts: Trade-offs in the yeast growth cycle constrain adaptation* 94
EMBO Workshop: Molecular mechanisms in evolution and ecology

Tassios, Aimilios
Investigating de novo gene emergence across the entire budding yeast subphylum 95

Tattini, Lorenzo
Pangenome variation graphs: improving yeast genomics with graph-based tools 96

Tellini, Nicolò
Shared polymorphisms across species accumulated across broad evolutionary timescales 97

Trébulle, Pauline
Yeast proteomic response to amino acid supplementation and media composition 98

Tsai, Hung-Ji
Dual RNAseq reveals aneuploidy-specific fungal-host interactions during oral infection 99

Vachova, Libuse
Specific metabolism enables the proliferation of cheaters within yeast communities. 100

Van den Bergh, Bram
Uncharted roads, uncertain journeys and outcomes? A persistence evolution story 101

Villarreal, Pablo
Domestication signatures and recent migration events in the non-conventional yeast Lachancea cidri 102

You, Shu-Ting
Mapping genotypes of cooperation 103

Zavaleta, Vasni
Generation of Saccharomyces eubayanus x Saccharomyces cerevisiae polyploid hybrids considering the large genetic diversity from both species 104
Ziv, Naomi  
**Multiple molecular events determine stochastic cell-fate switching in a eukaryotic system**

Zorrilla, Francisco  
**Metagenomics-driven metabolic modeling for microbial ecology**
