

Abohawya, Moustafa		
Delineation of oxaliplatin resistance drivers using CRISPR screens in patient-derived organoids		46
Achberger, Kevin		
A modular assembloid model of the optic nerve		47
Aguilar Cázarez, Kasandra		
3D in vitro model for the study of the reciprocal interactions between diffuse low-grade glioma and its microenvironment		48
Ahn, Ji-Su		
Evaluation of the regenerative potential of cell therapeutics using revival stem cell-containing intestinal organoid		49
Ak, Asli		
Quantifying functional receptivity using blastoids in an endometrium-on-chip		50
Akbari, Soheil	Presenter: Erdal, Esra	
Enhancing functional maturation of iPSC derived endodermal hepatic organoid (eHEPO)through modified culture conditions		51
Akkerman, Ninouk		
Reconstructing the development of fetal insulin-producing enteroendocrine cells		52
Albu, Marga		
Distinct mechanisms regulate ventricular and atrial chamber wall formation		53
Alderweireldt, Elien		
Effect on colorectal cancer bioenergetics by chronic exposure to red meat metabolites		54
Almalla, Ahed	Presenter: Alzain, Nadra	
Shear stress-induced differentiation and mucus production in human intestinal organoid- derived epithelial cells on dSIS-MA hydrogel scaffolds		55

Apsley, Elizabeth	
Modelling human Purkinje cell development using iPSC-derived cerebellar organoids	56
Ariño, Silvia	
Needle biopsy-derived liver organoids enable ALD modelling and drug response	57
Balzasch, Bianca	
Tumor-associated macrophages as effectors against colon cancer: Establishing a 3D culture to model the tumor microenvironment	58
Beckerova, Deborah	
Early onset of cardiac progenitor maturation leads to their depletion recapitulating cardiac pathology development in Duchenne Muscular Dystrophy	59
Ben Rached, Fathia	
3D brain organoid modeling of an epileptic encephalopathy consequent to a unique mutation in the GLP1R gene.	60
Bender, Tamara	
Cerebral organoid slices model CNS effects of particle radiotherapy in brain cancer patients	61
Boilève, Alice	Presenter: Jaulin, Fanny
Organoids as tools for functional precision oncology in advanced pancreatic cancer.	62
Bokkers, Marleen	
Modelling gut complexity and diseases: Development of a next-generation adult stem cell based tubular gut-on-a-chip model	63
Bokobza, Emma	
The milky way: a breast organoid journey	64
Brancato, Virginia	
Patient-derived organoids as tool to investigate tumor heterogeneity	65

Bruchhardt, Thea		
Development of primary cell-based infection models to study pathogenesis of campylobacter jejuni		66
Brunetti, Ludovica		
An organoid approach to study the developmental origin of cerebellar dysfunction in Joubert syndrome		67
Burnell, Stephanie		
Designing a computational analysis pipeline to estimate the number of cells within the 3-dimensional structure of an organoid		68
Calà, Giuseppe		
Prenatal derivation of lung organoids from the fetal fluids of healthy and congenital diaphragmatic hernia patients		69
Calà, Giuseppe	Presenter: Gerli, Mattia	
Single cell-guided prenatal derivation of primary fetal epithelial organoids from the human amniotic and tracheal fluids.		70
Candeli, Noah		
A robust ex vivo system to study cellular dynamics and development of human pulmonary NE cells		71
Caracci, Mario		
Media EGF starvation drives differential morphological development of mouse intestinal organoids		72
Cela, Carmela		
Artificial thymic organoids as a model to study physiopathology of human T cell development		73
Celiker, Canan		
Light-dependent modulation of microRNA expression in human retinal organoids		74
Celotti, Martina		
Uncovering the mutational signature of IDH1 mutants using human organoids		75

Ceylan, Merve	
The proteome of human jejunal enteroids for drug transport and metabolism studies	76
Chen, Yaoyao	
DermaCult™ keratinocyte expansion medium, a serum- and BPE-free medium supporting long-term feeder-free expansion of primary human epidermal and pluripotent stem cell-derived keratinocytes	77
Chen, Zexin	
Application of patient-derived organoids in the personalized medicine of targeted therapy and immunotherapy for lung cancer	78
Chiu, Man Chun	Presenter: Zhou, Jie
Establishing respiratory organoids for modeling SARS-CoV-2 infection	79
Choi, Yunju	
Disease modeling of type II long QT syndrome with genome-edited hiPSC-derived heart organoids	80
Christie, Jennifer	
Evaluation of drug toxicity in 3D hepatic organoids	81
Contreras Panta, Ela	
Type 2 Innate Lymphoid Cells (ILC2s) and Interleukin 13 (IL-13) promote maturation and proliferation in mouse metaplastic gastroids	82
Csukovich, Georg	
The opportunities and uncertainties of apical-out intestinal organoids for in vitro disease modelling	83
Daher, Ugarit	
An autologous human lung organoid infection model for preclinical testing of influenza A-specific T cell products	84
Dal Pozzolo, Francesca	
A platform for reproducible and scalable brain organoids to model neurodevelopmental disorders	85

Däullary, Thomas	Presenter: Fey, Christina	
Intestinal tissue models representing the in vivo situation to a high degree		86
De Munck, Julie		
Exposure of curcumin analogues to 2D and 3D intestinal in vitro models		87
Debbi, Erica		
Study of the morphology of astrocytes and neural rosettes in models of physiological and pathological neurodevelopment through tissue clearing techniques.		88
Defamie, Virginie		
Metalloproteinase inhibitors regulate biliary progenitor cell dynamics through controlled DLK1 release and Notch activation		89
Deiningger, Luca		
AI-based cerebral organoid monitoring and cysticity analysis using magnetic resonance imaging		90
Demetriou, Aphrodite		
Developing an immunocompetent in vitro 3D brain model of alzheimer's disease to study the neuroprotective effects of estrogen		91
Desboeufs, Nina		
DNA replication stress as molecular driver and potential therapeutic target in hepatocellular carcinoma		92
Dorigo Hochuli, Agner Henrique		
Novel three-dimensional multicellular layer structure: An advanced in vitro model for studying inflammatory bowel disease		93
Dubaic, Marija	Presenter: Barta, Tomas	
The role of ciliopathy protein TMEM107 in the eye development: Insights from retinal organoid and mouse model		94
Dusserre, Nathalie		
Glioblastoma resistance to treatment: can we decipher the role of the tumor microenvironment using a 3D bioprinted model?		95

Dutta, Ankita	
An annotated living organoid biorepository of gallbladder disease	96
Everitt, Gemma	
Characterisation, expansion and banking organoids for target validation, cell therapy and screening platforms.	97
Fahmi, Amal	
Harnessing human neural organoids to decipher the neuroteratogenic effects of the neglected West Nile virus	98
Fairley, Savannah	
Exploring the impact of cardiovascular disease on bone marrow physiology through organoids.	99
Fedele, Giorgia	
A new in vitro model of BBB and brain organoids to study the role of Mg in brain development	100
Fedorova, Veronika	
Induced pluripotent stem cells-derived cerebral organoids for the study of glioblastoma multiforme migration	101
Fekry, Mya	
Organoids represent key models in the translational medicine toolbox for addressing target identification and validation challenges in GPCR-related drug discovery	102
Ferreira, Bárbara	
Generation of patient-derived organoids from paediatric brain tumours	103
Fischer, Mara	
Immunocompetent lung organoids derived from primary human lung tissue for pneumonia research	104
Flegal, Matthew	Presenter: Laakso, Holly
Use of intestinal organoid models to study low-dose radiation effects	105

Flores, Elizabeth Yvonne		
iPSC-derived human organoid-based model of intestinal filovirus infection		106
Fojtík, Petr		
Investigating the impact of apolipoprotein E4 and reactive oxygen species on neural differentiation in alzheimer's disease development		107
Fumado Navarro, Josep		
Vascularised brain organoids: an in vitro testing platform for drug delivery systems		108
Ganguli, Sourav		
Deciphering the role of neurodevelopmental protein WDR62 in neural cancers		109
Gaston-Breton, Romane		
Evidences of sex-specific patterns in hypoxia-ischemia using human cortical organoid		110
Genovese, Ilaria		
Walking down the road of neurodevelopment to obtain both 2D and 3D cortical cultures from hiPSCs using one single protocol.		111
Glisovic, Neda		
Supracellular contractility of fibroblasts in homeostasis, injury, and wound healing		112
Gojanovich, Aldana		
Modeling genetic Creutzfeldt-Jakob disease using human iPSC-derived cerebral organoids		113
Gomez Budia, Mireia	Presenter: Korhonen, Paula	
Spiked up microglia-containing neural organoid model		114
Grunau, Kyra		
Generation of murine brain organoids from adult neural progenitor cells		115
Guedes, Maria		
A novel prostate organoid-based model to study male UTIs		116

Hadefi, Alia	Presenter: Garcia, M.Isabelle	
Duodenal-derived organoids to investigate gut epithelium in Nonalcoholic steatohepatitis (NASH) patients		117
Han, Sisu		
The influence of psilocybin on neurogenesis in human brain organoids		118
Handschin, Charles		
In vitro 3D culture of acinar cells to model a pancreatic cancer steatosis niche.		119
Hannuschke, Daniel		
Single cell RNA-sequencing of ALDH5A1-deficient cerebral organoids reveal disease-specific changes in neurodevelopment		120
Haston, Claire	Presenter: Sharma, Riya	
Efficient generation of functionally relevant hPSC-derived hepatocytes and liver organoids for hepatotoxicity and liver biology modeling		121
He, Mu		
Reconstructing the epithelial-mesenchymal signaling niche of the human proximal airway		122
Hein, Tabea		
Evaluation of matrices for automated organoid expansion		123
Hensel, Inga		
Human intestinal organoids uncover changes in goblet cell states and mitochondrial fitness induced by systemic lupus erythematosus serum stimulation		124
Hetzel, Jan-Patrick		
An iPSC-based platform for generation of genetically modified organoids		125
Hofer, Moritz		
A bioengineered platform for bilateral access to and enhanced observability of patterned gastrointestinal organoid monolayers		126

Honorato Ribeiro, Jessica		
Effects of ionizing radiation on brain development, modeled in human brain organoids	127	
Hou, Yuxin	Presenter: Li, Chang	
SARS-CoV-2-induced DEAD-box RNA helicase restricts viral replication in brain organoids	128	
Hříbková, Hana		
Unraveling the link between alzheimer's disease and herpes simplex virus using induced pluripotent stem cells-derived brain organoids	129	
Inciuraite, Ruta		
Evaluation of prolonged culturing impact on global methylation level of colon organoids derived from healthy individuals and ulcerative colitis patients	130	
Jain, Akanksha		
Morphodynamics of pattern emergence in human brain organoids	131	
Janev, Aleksandar		
Novel therapy using human amniotic membrane inhibits bladder cancer cells: insights from in vitro and patient-derived bladder cancer models	132	
Jeong, Jujin		
Differentiation of complex heart organoids from human pluripotent stem cells harboring a NKX2-5 reporter	133	
Jiashuang, Yang		
The combination effect of neutralization of IL-17 on immunotherapy in NSCLC tumor organoids – T cell coculture model	134	
Juliani, Juliani		
Understanding the role of Beclin1 in gut homeostasis using intestinal organoids	135	

Jung, Ji Hye

Activation of apoptotic pathway in glyoxalase 1 deficient T cells promote the growth of tumor spheroids 136
