

Agrawal, Himani		
Unlocking the evolutionary attributes of immunity-related myrosinases in <i>Arabidopsis thaliana</i>	41	
Behl, Rachna		
Multi-generational impact of future climate conditions on <i>Arabidopsis thaliana</i> redox homeostasis, epigenome and phenotype	42	
Bibi, Androniki		
Genome sequencing, assembly and annotation of the carob tree, <i>Ceratonia siliqua</i> (Eudicots:Fabaceae)	43	
Blank, Tim		
The adaptive potential of the leaf economics spectrum in the Brassicaceae	44	
Bose, Monidipa		
Comprehensive study of the novel CYP81F enzyme family members from Brassicaceae plants	45	
Bulut, Mustafa		
Natural genetic variation of thermal proteome stability with emphasis on RuBisCO	46	
Chen, Jiawen		
Starching point: understanding the biochemistry of starch granule initiation in <i>Arabidopsis</i> and wheat	47	
Chowdhury, Arpita		
Deciphering the leaf code: genetic and epigenetic insights into TCP-mediated morphogenesis in <i>Arabidopsis thaliana</i>	48	
De Jager, Nicholas	Presenter: Shukla, Varsa	
Adaptive potential of sulfate content in <i>Arabidopsis thaliana</i>	49	
Domingues, Douglas		
Genome-wide analysis of lipoxygenase genes in <i>Coffea</i> species: differential expression and enzymatic activity influenced by hexanoic acid	50	

Floean, Matilde	Presenter: Köllner, Tobias	
Reinventing metabolic pathways: independent evolution of specialized metabolites in flowering plants		51
Hayashi, Koki		
Metabolite profiling of Arabidopsis epiRILs for the identification of epialleles		52
Helusova, Lenka		
GH3 and ILL Spotlight: mapping auxin conjugation machinery in tobacco by-2 cells		53
Ichino, Takuji		
Lipid transfer protein facilitates apoplastic secretion of lipophilic specialized metabolites by interacting with the biosynthetic enzyme in a boraginaceaeous medicinal plant		54
Jiang, Bin	Presenter: Wang, Haijun	
Characterization and heterologous reconstitution of Taxus biosynthetic enzymes leading to baccatin III		55
Kamileen, Mohamed Omar		
Oxidative tailoring of alkaloid scaffolds in Tabernanthe iboga		56
Kellari, Loukia		
A beneficial fungal endophyte triggers RNA silencing to an intronless but not to an intron-containing host reporter gene		57
Kowalczyk, Justyna		
Sequencing and comparative analysis of genomes provide insights into a diversity of cell wall architecture in unicellular green algae		58
Lalak-Kanczugowska, Justyna		
Molecular basis of phytochelatin synthase function in pathogen-triggered indole glucosinolate metabolism in the Brassicaceae family		59
Leja, Katarzyna		
AT4G25290 from Arabidopsis thaliana represents a novel protein group and is involved in plants stress responses		60

Lin, Ruoxi		
Defining diterpene diversity in Coleus		61
Mao, Jian-Feng		
LTR-checker: deep-learning (DL) guided structural identification of LTR retrotransposon providing decreased computation demand and high flexibility		62
Nguyen, Le Han		
Transcriptome analyses reveal 12 conserved orthologs likely involved in carpel formation of <i>Eschscholzia californica</i>		63
Nicol, Lauren		
Functional analysis of the cytochrome P450 71B subfamily		64
Nolte, Nadja		
Exploring allele-specific expression in tetraploid potatoes using long-read RNA sequencing		65
Ofir, Gal		
F-box proteins - the second most diverse family of <i>Arabidopsis</i> genes		66
Paponov, Martina	Presenter: Paponov, Ivan	
Species-specific responses in <i>Artemisia annua</i> and <i>Hypericum perforatum</i> to heterogeneous nutrient supply: implications for root exudation and secondary metabolite accumulation		67
Perkovic, Milana		
Decoding the biosynthetic pathway of the anticancer alkaloid piperlongumine in <i>Piper fimbriatum</i> plant using metabolomics and transcriptomics		68
Perkowska, Izabela		
The role of dioxygenases conserved in land plants in <i>Arabidopsis</i> responses to environmental stresses - interplay between oxylipins and flavonoids		69
Petroll, Romy		
Genomic evolution underlying red algal species diversity		70

Priego Cubero, Santiago	Presenter: Becker, Claude	
Evolution and diversification of the momilactone biosynthetic gene cluster in the genus <i>Oryza</i>		71
Priego Cubero, Santiago		
Sub-functionalisation and epigenetic regulation of a biosynthetic gene cluster in <i>Physalis grisea</i>		72
Schmidt, Vojtech		
From algae to land plants: tracing the evolution of phytohormone biosynthesis		73
Singh, Kumar Saurabh		
Deciphering metabolic pathways in plants using meantools: a multi-omics approach		74
Smit, Samuel		
Exploring specialised metabolism in the mint family of plants using comparative genomics		75
Suresh Kumar, Jisha		
The genetic basis of temperature mediated plasticity in <i>Cardamine hirsuta</i>		76
Van Beirs, Caroline		
Branching out: unravelling novel functions of the phenylpropanoid pathway in moss		77
Vletsos, Panagiotis		
Developing a synthetic biology toolbox for metabolic engineering of the legume crop plant <i>trigonella foenum-graecum</i>		78
Yu, Xinshui		
Application of thermal proteome profiling for the discovery of biosynthetic enzymes in plants		79
Zhu, Yuling		
Discovery and functional study of a laccase with unique catalytic function in <i>Morus alba</i>		80
