

EMBO | EMBL Symposium: Microtubules: from atoms to complex systems

Poster Removal - Please remember to collect your poster. Posters which have not been collected will be disposed of after the meeting.

Feedback Questionnaire - Check your inbox when the meeting ends. You will find an email with the link to the online feedback questionnaire. Please take time to complete it.

A, Jeganath		
Deciphering the role of microtubule post-translational modifications in cellular positioning and function of lysosomes		49
Abel, Anne-Catherine	Presenter: Prota, Andrea E.	
Bridging the maytansine and vinca sites: cryptophycins target β-tubulin's T5-loop		50
Abid Ali, Ferdos		
KIF1C activates and extends dynein movement through the FHF cargo adaptor		51
Adhikary, Kuheli		
A spindle positioning independent role of LIN-5/GPR-1/2 in cytokinesis		52
Agarwal, Riddhi Girdhar		
Mobilization of the microtubule plus-end binding protein, EB1, promotes the olfactory cilium growth in Drosophila		53
Aher, Amol		
Structure of the γ-tubulin ring complex-capped microtubule		54
Aher, Amol	Presenter: Kapoor, Tarun M.	
Structure of the γ-tubulin ring complex-capped microtubule		55
Al-Bassam, Jawdat		
Cryo-EM structure of the Augmin complex reveals its complex coiled-coil organization		56
Badieyan, Somaye	Presenter: Cianfrocco, Michael	
HIV-1 binds dynein directly to hijack microtubule transport machinery		57
Bangera, Mamata	Presenter: Moores, Carolyn	
Structural and dynamic visualization of the MAP7-microtubule interaction		58
Basu, Jashaswi		
Effect of macromolecular crowding size on microtubule polymerization		59

Basu, Sreya	
KIF2A maintains pluripotency in mouse embryonic stem cells by stabilising intercellular bridge microtubules during cytokinesis	60
Batiuk, Alina	
Autoregulation of tubulin mRNA via reversible TTC5 sequestration by soluble α-tubulins	61
Beaumale, Eva	Presenter: Joly, Nicolas
Identification of Katanin's Microtubule Binding Domains highlights the critical role of its regulatory subunit (p80) in Microtubule-severing activity	62
Benoit, Matthieu	
Cryo-EM unveils the processivity mechanism of KIF1A and the impact of its pathogenic variant P305L	63
Berisha, Anne-Marie	
Regulation of Kinesin-1 activity by MAP7/Ensconsin: role in microtubule network remodeling	64
Bhattacharya, Rachita	
Microtubule acetylation regulates squamous cell morphogenesis and carcinogenesis in <i>Drosophila</i>	65
Binder, Annika	
Microtubule inner proteins are essential for transmission of the malaria parasite	66
Biswas, Subham	
Lattice dynamics in microtubules: revealing the dual effects of tau	67
Biswas, Subham	Presenter: John, Karin
Lattice dynamics in microtubules: theoretically exploring the dual effects of Tau	68
Boiardi, Martina	Presenter: Frolov, Nikita
Microtubules tune the pace of the cell cycle in <i>Xenopus laevis</i> egg extract	69

Boice, Ashley	Presenter: Dere, Ruhee	
The promise of off-target epigenetic therapies as on-target tools uncovering spindle biology		70
Bonato, Francesca	Presenter: Oliva-Blanco, María Ángela A.	
Insight into microtubule's structural signaling using engineered paclitaxel C7-derived compounds		71
Bousquet, Clément		
Microtubules adopt a new type of lateral interaction in response to excessive protofilament skew		72
Brito, Claudia		
Transition of human γ-tubulin ring complex into a closed conformation during microtubule nucleation		73
Brownlee, Christopher		
Importin α partitioning to the plasma membrane is required for mitotic spindle orientation and the prevention of microcephaly		74
Cassidy, Anna		
Investigating the role of the GTP-cap in the regulation of microtubule dynamics in mammalian cells		75
Chakraborty, Shreyangi		
Reduced tubulin polyglutamylation affects neuronal function and causes late-onset neurodegeneration		76
Chang, Po-Han		
Exploring the regulation of microtubule detyrosination and polyglutamylation through semi-synthetic tubulin		77
Chen, Po-Pang		
HSET-mediated transport of CDK5RAP2-condensate facilitates centrosome clustering in cancer cell		78
Chew, Yean Ming		
The subtle allostery of kinesin and tubulin		79

Chiba, Kyoko	
The prominent role of the FHA domain in the autoinhibition of KIF1A/UNC-104	80
Chocat, Tanguy	
Shedding light upon stables microtubules and characterization of the network's renewal	81
Choi, Sung Ryul	
Structural basis of the microtubule-GEFH1 signaling complex and its implications in RhoA-mediated immune cell activation	82
Chorro, Adrià	
Dendritic bubbles as a novel MTOCs in Drosophila class I da neurons	83
Choudhury, Madhurima	
Microtubule plus-end body guides the mitotic spindle in budding yeast	84
Coelho de Almeida, Ana	
Functional implications of tubulin autoregulation in spheroids	85
Colombo, Sabina	
NuMA is a dynein adaptor that preferentially binds and stabilize microtubule minus ends	86
Cormerais, Clément	
Effects of oxfendazole, a microtubule-targeting agent, on the microtubule network in filarial parasites	87
Cozma, Christian	
A bottom-up approach to investigate dynamic spindle organization in budding yeast	88
Cross, Jessica	
Allosteric regulation of the microtubule motor kinesin-1 through de novo protein design	89
Cueff, Louis	
Microtubule stiffening by ZYG-8 participates in spindle positioning and orientation during C. elegans embryo division	90

Deguchi, Takahiro		
MINFLUX tracking for monitoring stepping dynamics of kinesin-1 in live cells		91
Desvigne-Hansch, Eva	Presenter: Lopes, Danilo; Desvigne-Hansch, Eva; Chang, Chieh-Yu	
Determining the mechanistic roles of tubulin glutamylation in the regulation of neuronal functions		92
Donker, Lisa		
The role of microtubules in secretion		93
Egoldt, Cornelia		
Microtubule damage regulates (de)acetylation in vitro		94
Elfarkouchi, Abir		
Spatiotemporal regulation of microtubules nucleation during cell division		95
Estevez-Gallego, Juan		
Hydrolysis-deficient mosaic microtubules as faithful mimics of the GTP cap		96
Fariña-Mosquera, Marcos		
Insights into non-mitotic roles of augmin		97
Formanek, Maud	Presenter: Nedelec, Francois	
Refined collision statistics support a force-based model of cortical microtubule organisation		98
Fu, Guoling		
Human α-tubulin isotypes regulate tubulin tyrosination, microtubule dynamicity and depolymerase-mediated stability		99
Gao, Qi	Presenter: Gao, Qi; Hofer, Florian Walter	
Structural underpinnings of centrosomal γ-TuRC organization		100
Geng, Qi	Presenter: Verhey, Kristen J.	
KIF1C, an RNA transporting kinesin-3, undergoes liquid-liquid phase separation through its C-terminal disordered domain		101

Geraghty, Zoë	
Controlling kinesin oligomerisation for a new tool to explore spindle self-organisation in vitro	102
González Fernández, Martín	
Docetaxel response in BRCA1;p53-deficient mammary tumor cells is affected by Huntingtin and BAP1	103
Greaney, Jessica	
A light-inducible tool to deconstruct the CAMSAP3-dependent microtubule network in pluripotent cells	104
Grover, Rahul	
Regulation of bidirectional vesicular transport by membranes and MAPs	105
Grover, Rahul	
Dynamic interactions between microtubules and RNA-binding proteins	106
Grubic, Tarik	
Phase separation of a microtubule plus end tracking protein into a fractal network	107
Grycova, Lenka	
ATP facilitates microtubule-protective function of tau	108
Guesdon, Audrey	Presenter: Vitre, Benjamin
In vitro reconstituted system shows a functional regulation of the mitotic kinesin HSET by Intraflagellar Transport protein complexes	109
Guilloux, Gabriel	
Expansion microscopy of Xenopus egg extract spindles	110
Gurkaslar, Hazal Kubra	
Cep152 insufficiency results in incomplete centrioles and impairs PLK4 activation	111
Halász, Henriett	
Microtubules orchestrate the mitochondria transport via tunnelling nanotubes between B cells	112

Halász, Henriett	Presenter: Szabó-Meleg, Edina	
Intercellular routes: membrane nanotube networks among B lymphocytes - essential drivers of growth and transport functions		113
Hamid, Ibrahim		
Mechanical role of microtubules during angiogenesis: focus on specific mt subpopulations		114
Hargreaves, Eleanor		
Targeting the SxIP-EB1 interaction using small engineered peptides alters cytoskeletal dynamics		115
Harmanda, Büsra	Presenter: Ayaydin, Halenur	
Aurora B kinase dependent phosphorylation of Keratin 8 is required for cytokinesis in mammalian cells of epithelial origin		116
Hoogebeen, Robin		
Control of microtubule protofilament number by end-binding proteins		117
Hotta, Takashi	Presenter: Ohi, Ryoma	
The C-terminal tail of α-tubulin is an effector domain that is regulated by microtubule lattice conformation		118
Ivanova, Daria		
Transient lagging chromosomes originating from poleward microtubule flux defects cause primary microcephaly		119
Iwanski, Malina		
MAP7 family members mediate Kinesin-1 selectivity		120
Iyer, Saishree		
Reconstituting slow and steady centriolar microtubule growth in vitro		121
Jannasch, Anita		
Superpower behavior of the budding yeast kinesin-8		122
Jaramillo, Carla		
H-ABC tubulinopathy exhibits altered tubulin post-translational modifications		123

Jawale, Yash	
Understanding aster and minimal mitotic spindle positioning in cell-like confinement	124
Kaade, Rayane	
Slender lobes: evidence of a spindle matrix in oocytes	125
Karnawat, Vishakha	
ATPγS drives robust directional stepping of kinesin under load	126
Khanfir, Sinda	
Selective control of microtubule mechanics by tubulin isoforms and posttranslational modifications	127
Khuntsariya, Daria	
Microtubule doublet assembly in vitro and its regulation by PACRG and FAP20	128
Khushalani, Deepak	
Elucidating the mechanisms of differential association of MAPs on MT-PTMs and their implications on motors	129
Kickuth, Alison	
A mechanical ratchet mechanism allows cell division without the contractile ring	130
Kiewisz, Robert	
Accurate and fast segmentation of filaments and membranes in electron micrographs and tomograms with TARDIS	131
Komarek, Jan	Presenter: Barinka, Cyril
Mapping interactions between protein regulator of cytokinesis (PRC1) and Dishevelled 3 (DVL3)	132
Kraus, Jodi	
The augmin complex is regulated by RanGTP via its microtubule binding domain	133
Kumar, Pankaj	
Effect of lipid-motor interaction on cargo transport across evolutionary hierarchy	134

Lacey, Samuel		
Extensive structural rearrangement of intraflagellar transport trains underpins bidirectional cargo transport in cilia		135
Laporte, Damien		
A stable microtubule bundle formed through an orchestrated multistep process controls quiescence exit		136
Lebrun, Laura	Presenter: Onclercq-Delic, Rosine; Henriot, Veronique; Lebrun, Laura	
Elucidating the tubulin code and its functions through novel in vitro and in vivo tools		137
Lee, Jessica	Presenter: Peel, Nina	
Microtubule glutamylation in <i>C. elegans</i>: required for cold tolerance and male mating, dispensable for centrosome function		138
Legal, Thibault		
Structure of the ciliary tip central pair reveals unique microtubule-binding proteins		139
Leung, Miguel		
Elaborate microtubule inner protein networks reinforce mammalian sperm flagella		140
Liu, Dong	Presenter: Prakash, Manjari	
Optineurin tethers anterograde mitochondrial complex to microtubules to promote axonal mitochondrial transport		141
Liu, Yu-Cheng	Presenter: Wei, Jen-Hsuan	
γ-TuRC controls cortical development by promoting microtubule nucleation-dependent radial migration and nucleation-independent neuronal differentiation		142
Lopes, Andre		
CDKL5's role in microtubule-based transport and cognitive function		143
Lucena-Agell, Daniel	Presenter: Díaz, José-Fernando	
Chemical modulation of the microtubular lattice structural parameters		144

Luo, Jingyi

Presenter: Luo, Jingyi; Ti, Shih-Chieh

Multivalent microtubule luminal recognition and modification by tubulin acetyltransferase 145

Maci, Francesca

Functional analysis of chTOG in kinetochore-spindle microtubule interactions during mitosis 146

Mammri, Léa

Exploring the mechanism of γ -TuRC activation 147

Marien, Jules

It takes Tau to tango: investigating the fuzzy interaction between the Tau-R2 repeat and tubulin C-terminal tails 148

McManus, Collin

Insights into how XMAP215 nucleates microtubules with γ -TuRC 149

Meiring, Joyce C. M.

Targeted disassembly of the stable microtubule subset 150

Messuti, Eleonora

NF1 is a novel MAP involved in microtubular dynamics and intra-tubular damage repair 151

Minagawa, Mamika

A chemical genetic screen to isolate anti-microtubule drugs for *S. pombe* using the benzimidazole-resistant mutant *nda3-TB101* 152

Mitra, Aniruddha

Mapping microtubule polarity in mammalian neurons using expansion microscopy 153

Molines, Arthur

Microtubule dynamic instability is sensitive to specific biological viscogens in vitro 154

Moruzzi, Liz

Engineering of an autoregulated, semi-synthetic motor protein 155

Mosqueda, Natalie		
The role of palmitoylated importin alpha in ciliogenesis and cilia maintenance		156
Mukherjee, Amrita	Presenter: Taieb, Anaelle; Becam, Isabelle	
γ-TuRCs and Augmin are required for the development of highly branched dendritic arbors in Drosophila		157
Mukherjee, Amrita	Presenter: Becam, Isabelle; Taieb, Anaelle	
γ-TuRCs and Augmin are required for the development of highly branched dendritic arbors in Drosophila		158
Mutso, Margit		
TRMT112 network methyltransferases interact with tubulins		159
Nakata, Rinaho		
Investigating the role of phosphorylation in tau-microtubule interaction		160
Nandakumar, Shweta	Presenter: Nandakumar, Shweta; Wieczorek, Mirko	
Pretubulysin: a more potent microtubule depolymerizing drug than Nocodazole		161
Kalutskii, Maksim		
Microtubules grow by stochastically selecting conformations with long-lived clusters of short protofilaments at the dynamic tips		162
Niedzialkowska, Ewa	Presenter: Stukenberg, Todd	
Chromosomal passenger complex condensates generate parallel microtubule bundles in vitro		163
Nur, Hande		
Ciliopathy-linked protein CCDC66 regulates spindle orientation, cleavage furrow formation and abscission during cell division		164
Orozco Monroy, Beatriz Eugenia		
Opto-controlled DNA segregation for a synthetic cell using the ParMRC bacterial system		165

Paris, Rebeca	
Fluorescent probes for visualizing microtubules and their function	166
Paukovich, Natasia	
Human-specific Olduvai protein as a novel binding protein for neuronal Kif5A	167
Pavlova, Gera	
How do microtubule regulators work together with Kinesin-14 in meiotic spindle stability?	168
Perry, Carmen	
Understanding the role of chromosomal instability in taxane-resistant BRCA1-deficient mammary tumors	169
Planelles-Herrero, Vicente Jose	
A novel mechanism of microtubule modification at the mitotic spindle	170
Popp, Yannes	
Interplay between microtubule post-translational modifications and curvature	171
Prat Oriol, Núria	
Regulation of the k-fiber minus-end dynamics by the KANSL complex	172
Prokop, Andreas	
What axonal microtubule bundle regulation can reveal about neurodegeneration	173
Rai, Dipti	Presenter: Radul, Elena
Interplay between CAMSAPs, katanin, WDR47 and MCAK in controlling microtubule minus-end dynamics	174
Reichlmeir, Marina	
ATM-mediated regulation of neurite outgrowth via CRMP5-microtubule axis	175

Rice, Luke M.		
Progress toward understanding how a TOG domain suppresses catastrophe and promote rescue		176
Roby, Nicolas	Presenter: Rauzi, Matteo	
Nuclear migration and microtubule network remodelling regulate the activity of the actomyosin cortex powering tissue morphogenesis		177
Rodriguez, Morgane		
Characterization of Mklp2/IFT proteins mitotic complex regulation		178
Romeiro Motta, Mariana		
The cell cycle controls spindle architecture in Arabidopsis by modulating the augmin pathway		179
Rux, Caleb		
Force-dependent spindle microtubule damage, remodeling and stabilization		180
Sachs, Rachel		
Investigating the function of tubulin polyglutamylation during mitosis		181
Sadan, Mayan		
Effect of the non-canonical microtubule-binding on bi-directional motility of the mitotic kinesin-5 motor protein Cin8		182
Saju, Athira		
HURP binding to the vinca domain of β-tubulin accounts for cancer drug resistance		183
Sato, Masamitsu		
A chemical genetic screen using fission yeast identifies novel anti-microtubule drugs		184
Saunders, Harriet		
A module of interacting ciliary tip proteins with opposing activities regulates slow and processive microtubule growth		185
Scheiderer, Lukas		
Tiny dancer kinesin-1: novel mechanistic insights with MINFLUX		186

Scrofani, Jacopo	Presenter: Ruhnow, Felix	
Branched microtubule nucleation and dynein transport organize RanGTP asters in <i>Xenopus laevis</i> egg extract		187
Scrofani, Jacopo		
Dissecting the role of polyglutamylation during RanGTP-driven microtubule assembly in <i>Xenopus laevis</i> egg extracts		188
Serna, Marina		
CryoEM and image processing of the γ-Tubulin Ring Complex while nucleating microtubules		189
Serna, Marina		
CDK5RAP2 activates microtubule nucleator γTuRC by facilitating template formation and actin release		190
Sharma, Aditi		
Role of tubulin (de)tyrosination in the microtubule-actin crosstalk: implications for dendritic spines in health and disease		191
Shemesh, Asaf	Presenter: Raviv, Uri	
Structures, energetics, and dynamics of active tubulin self-organization		192
Singh, Kashish		
Molecular mechanism of dynein-dynactin complex assembly by LIS1		193
Sluimer, Lilian		
Center on centrosomes: how CLASPs control microtubule density		194
Soler, Nina	Presenter: Da Silva, Mathis	
Kinetochore microtubules flux poleward along fixed centrosome anchored microtubules during the metaphase of <i>C. elegans</i> one-cell embryo		195
Song, Yinlong		
Control of microtubule nucleation and density in interphase mammalian cells by centrosomal proteins		196

Steffens, Sarah	
Genetic phenotyping at single cell resolution in 3D sprouting assay to study the role of microtubules during sprouting angiogenesis	197
Steilberg, Simone	
Functional interplay of the endoplasmic reticulum and the mitotic spindle	198
Štimac, Valentina	
Spindle actin promotes integrity and focusing of the spindle poles	47
Štimac, Valentina	
Microtubule pivoting driven by spindle elongation rescues polar chromosomes	48
Suresh, Bhagyanath	
Force balance of opposing diffusive motors generates polarity-sorted microtubule patterns	199
Sutton, Patrick	
Palmitoylated importin alpha regulates mitotic spindle orientation through localization of the nuclear mitotic apparatus, NuMA, to the cell cortex	200
Tomaz, Lucian	
Determining the role of WDR-62/WDR62 in microtubule organization across differentiated cell types	201
Toya, Mika	
CAMSAP2 is required for bridging fibre assembly to ensure mitotic spindle assembly and chromosome segregation in human epithelial Caco-2 cells	202
Travis, Sophie	
Structure and function of the augmin complex in microtubule nucleation	203
Tüfekçi, Dilaray	
Investigation of interaction between EML1 and microtubules	204

van Grinsven, Emma		
Structure of microtubule-organizing centers in multiciliated cells revealed by expansion microscopy and computational averaging		205
Venditti, Martina	Presenter: Lauri, Antonella	
Uncovering early signs and microtubules impairments preceding disease-onset in a zebrafish model of rare tubulinopathy with untreatable neurodegeneration		206
Vermeulen, Bram J. A.	Presenter: Vermeulen, Bram J. A.; Gao, Qi	
γ-TuRC asymmetry induces local protofilament mismatch at the RanGTP-stimulated microtubule minus end		207
Vernos, Isabelle		
The role of microtubule polyglutamylation in chromosome segregation fidelity during mitosis in normal and cancer cells		208
Vicente, Juan Jesus		
The kinesin motor Kif9 regulates centriolar satellite positioning and mitotic progression		209
Wiest, Andreas		
Alpha-tubulins are modified with a tyrosine probe in living cells with high selectivity		210
Würtz, Martin		
Building upon HAUS architecture: molecular insights into augmin's microtubule interaction		211
Xu, Yixin		
Closure of the γ-tubulin ring complex by CDK5RAP2 activates microtubule nucleation		212
Ye, Yucheng	Presenter: Ye, Yucheng; Ti, Shih-Chieh	
Force-sensitive lattice breathing regulates the accessibility of confined microtubule lumen for enzymes		213
Zakar, Tomáš		
Modulation of tubulin self-assembly competence by microsecond pulsed electric fields		214

Zang, Juliana	Presenter: DeSantis, Morgan	
A novel regulatory modality gates dynein activity at the cell periphery		215
Zerkoune, Samya		
From microtubule-depolymerisation to F-actin nucleation inhibition: Fidgetin-like 1 versatile role in neuronal circuit wiring		216
Zhao, Guoli		
Kinetochores affect microtubule dynamics in neuron		217
Zheng, Anjun	Presenter: Zheng, Anjun; Vermeulen, Bram J. A.	
A structural and functional view on γ-tubulin complex assembly and microtubule polymerase recruitment by <i>C. albicans</i> Spc72		218
Zorgniotti, Agustina		
L-Dopa incorporation into microtubules: implication for synaptic integrity and neuronal degeneration		219
