

### **Advancing Confocal Imaging**

#### **Unlocking Discovery with the new FLUOVIEW™ and Next-Generation SilVIR™ Detection**

by Bülent Peker, Evident Europe

Join us at Seeing is Believing 2025 for an exclusive Evident workshop introducing the new FLUOVIEW confocal laser scanning microscope, purpose-built to meet the evolving challenges of modern imaging.

Based on the IXplore™ IX85 imaging platform, the system features intuitive workflows, intelligent automation, and AI-powered tools designed to accelerate precision imaging for researchers at every level. Powered by our enhanced SilVIR detector and scanners, it delivers confocal images with unmatched clarity and photon-level precision across all fluorescence intensities.

This session will preview new upgrade options and scanning features that expand the platform's flexibility and scalability. For facilities aiming to accelerate workflows, the new FLUOVIEW offers intuitive automation, smart imaging tools, and reliable support for reproducible, quantitative data.

From optimizing workflows to exploring the latest optical technologies, this session highlights how the new FLUOVIEW is advancing confocal imaging.
