Abbondanza, Alice Sex-related differences in nicotinic activation of NPY-expressing neurons in feeding and stress	42
Agber, John Screening of phytoconstituents of Tetrapleura tetraptera and the effect of its dietary inclusion on expression of some neurodegeneration-related oxidative stress genes in Drosophila Melanogaster	43
Aleksic, Milan The role of flexible ribosomal RNA expansion segments in recruitment of methionine aminopeptidase-like proteins to the ribosomal exit tunnel	44
Arriaga Saez, Iker Cellular and structural characterization of VP1 and VP2 knockout mutants of AAV3B serotype and implications for AAV based gene therapy	45
Bayraktar, Gülberk Investigation of the sodium-potassium pumps at the axon initial segment	46
Becker, Paul Control of organelle biogenesis by the Lipin switch	47
Behr, Tiana Short tau filaments are packaged into extracellular vesicles in Alzheimer's disease patient brain	48
Bernhard, Harald Structural characterization of the nuclear cap binding complex of kinetoplastida	49
Briola, Giuseppina Rosaria Understanding the PCNA-directed modulation of Pol delta rate of DNA synthesis using Cryo-EM	50
Capitanio, Cristina Uncovering the ultrastructure of selective autophagy in mammalian cells	51

EMBO Workshop: In situ structural biology: from cryo-EM to multi-scale modelling	
Daksh, Daksh Cross-modality image registration using Unsupervised Deep Learning techniques	52
Dannersø, Josephine Karlsen Presenter: Hansen, Sean Elucidating the structure of microdomains of the axon initial segment	53
De Felice, Sofia Structural analysis of Pseudomonas aeruginosa SOS machinery components	54
Deguchi, Takahiro Direct observation of motor protein stepping dynamics in living cells using MINFLUX nanoscopy	55
Diepenhorst, Natalie CryoEM to enable drug discovery at orphan G protein-coupled receptor GPR88	56
Dobbs, Joe Towards visual proteomics of gene expression in a minimal bacterium	57
Dudka, Wioleta Elucidating the origin and consequence of cellular lipid droplets structural diversification	58
Dutta Chowdhury, Unmesh The effect of Tau Fibrils on the Lipid Bilayers: from the Model Membrane to the Neuronal Membrane	59
Ekemezie, Chinenye Redefining the species specificity of ribosomal drug-binding sites	60
Foster, Bronwen Electron cryo-tomography of human iPSC-derived neurons to study structural changes in Alzheimer's disease	61

Fung, Herman Genetically encoded multimeric tags for protein localisation in cellular cryo-electron tomography	62
Garg, Priyanka Functional and structural characterisation of DNA-protein interactions of DNA binding protein(MsDps2) from Mycobacterium Smegmatis	63
Girois, Loïc Towards molecular architecture of the tcp DNA transfer machinery	64
Greiwe, Julia Towards the structural understanding of eukaryotic DNA replication origin activation	65
Hernandez Gonzalez, Miguel Electron cryo-tomography of vaccinia-infected cells	66
Hoffmann, PatrickPresenter: Kreysing, Jan PhilippStructure of the eukaryotic ribosome and its translational states in situ	67
Houghton, Francesca Presenter: Mcdonald, Neil Visualising GDNF-GFRa1 synaptic adhesion complexes and their regulated disassembly	68
Hussain, Nazia Structural insights into pore dynamics of human Pannexin isoforms	69
Ibrahim, Bashar Multi-scale stochastic organization-oriented coarse-graining exemplified on the human mitotic checkpoint	70
Isbilir, Buse Structural basis for directed propagation of conjugative transposons and their antibiotic resistance cargo	71

EMBO Workshop: In situ structural biology: from cryo-EM to multi-scale modelling		
Islam, Zeyaul Structure determination of α -synuclein crystals grown in mammalian cells using cryo-FIB and microED		72
lyer, Mukthi Dynamics, structure and function of nuclear Actin-Cofilin rods during cellular stress response.		73
Kezar, Andreja Structural biology of plant (poty)viruses		74
Khavnekar, Sagar Towards the Molecular Atlas of C. reinhardtii using high-throughput collaborative in situ cryo-ET		75
Klumpe, Sven Revisiting visual proteomics by cryo-electron tomography of cryo-FIB lamellae		76
Lycas, Matthew Visualizing the ultrastructure of the dopaminergic synapse using cryo-CLEM and cryo-ET		77
Mackmull, Marie-TheresePresenter: de Souza, NatalieGlobal in situ analysis of the structural proteome in individuals withParkinson's disease to identify a new class of biomarker		78
Mahadevan, Jyothi Dynamics of endogenous PARP1 and I revealed by live-cell single-molecule in		79
Mesa, Pablo Structure of the RAF1-HSP90-CDC37 c RAF1 regulation	Presenter: Montoya, Guillermo complex reveals the basis of	80
Mojiri, Soheil Cryo Correlative Single Molecule Loca Laser-generated heat transfer simulati different support coating materials and mediums	on in frozen EM grids with	81

Nathanail, Evangelia Regulating mitochondrial form: structure-to-function studies of MICOS as insight into cristae junction formation	82
Passera, Alessandro Multiplexed fluorogenic DNA-PAINT for MINFLUX nanoscopy	83
Rau, Alexander Modelling of novel protein-protein interactions identified by crosslinking mass spectrometry	84
Roganowicz, Karolina In situ Architecture of Intracellular Bacterial Communities in Urinary Tract Infections	85
Ruwolt, Max Methodological advances in cross-linking mass spectrometry increase detection sensitivity and quantification accuracy for large-scale interactomics studies	86
Sachweh, Jenny Origin of Nuclear Pore Complex asymmetry across the nuclear envelope	87
Salo, Veijo Elucidating the nanoscale architecture of ER-LD contact sites via cryo-correlative light and electron tomography	88
Schaefer, Simon In situ Analysis of Poxvirus early Transcription	89
Sheng, Yuewen A novel CryoEM sample preparation method utilizing picolitre volume dispensing technology and graphene grids	90
Siggel, Marc Towards integrative modelling and simulation of complex membrane structures derived from cryo-electron tomography	91
Skalidis, Ioannis Al-guided cryo-EM probes a thermophilic cell-free system with succinyl-coA manufacturing capability	92

EMBO Workshop: In situ structural biology: from cryo-EM to multi-scale modelling	
Smeets, Marit Presenter: Daviran, Deniz Improving cryo-electron tomography data quality and throughput by streamlining the workflow	93
Soriano Jerez, Eva Maria In-situ organisation of microtubule fasciculation by TRIM46	94
Spindler, Marie-Christin Visualizing the structural basis of stress-induced cell reorganization in yeast	95
Stojanovska, Frosina Structural and spatial 3D cell model of a genome-reduced bacterium emanated from in situ cryo-ET	96
Taniguchi, Reiya Cryo-ET analysis of nuclear pore complex from mouse embryonic stem cells	97
Tararbeih, Tareq Ribosomal stalling by short peptides targeting conserved sites in the ribosome: a new class of novel ribosomal antibodies.	98
Tollervey, Fergus Architectural Development of the C. elegans Centrosome as Visualised by Cryo-Electron Tomography	99
Trebichalská, Zuzana In-situ cryo-electron tomography of Enterovirus replication	100
Tueting, Christian Proteomics as a tool for Al-guided cryo-EM density interpretation in yeast native cell extracts	101
Wang, Renjing Cryo-EM structure of NLRP3 bound to inhibitor mcc950 enabled by leveraging multiprong structural biophysical strategy	102
Watson, Helena In situ structural investigation of bacterial antiviral defence systems	103

Wu, Yu-Le Maximum-likelihood model fitting for quantitative analysis of SMLM data	104
Yadav, Vaishali Decrypting the interaction pattern of piperlongumine with calf thymus DNA and dodecamer d(CGCGAATTCGCG)2B-DNA: spectroscopy, electron microscopy and molecular docking analysis	105
Zabeo, Davide	
The Electron Bio-Imaging Centre (eBIC)	106
Zhang, Xiaojie Molecular mechanisms of stress-induced reactivation in mumps virus condensates	107
Zimmerli, Christian	
Nuclear pores dilate and constrict in cellulo	108
Zimmermann, Liv Cryo-electron tomography of SARS-CoV-2 replication and assembly sites reconstituted in cells	109
Zimmermann, Michael Microfluidic sample preparation for Electron Microscopy	110
