

Kisker Biotech

ABOUT

Kisker Biotech: Beyond Drosophila. More than you might expect.

You may know Kisker Biotech for Drosophila consumables – but there is much more to discover.

For more than 30 years, we have been supporting life science research with laboratory consumables, equipment and personal scientific support. From pipette tips, PCR and cell culture products to sample preparation, storage and laboratory equipment, we help researchers find practical solutions for everyday laboratory work.

As part of the Dominique Dutscher Group, we combine personal local support with access to a broad European supplier network, strong logistics and more than 150,000 products.

Visit our booth to discover what Kisker can do beyond Drosophila: alternative products, ClearLine solutions, sourcing support and opportunities to simplify procurement and reduce costs.

No fixed demo times – just stop by and talk to us.

Beyond Drosophila: Kisker Biotech – Supporting Research Through Reliable Laboratory Supply

Efficient research depends not only on scientific expertise, but also on reliable access to laboratory consumables, equipment and everyday essentials.

Kisker Biotech has been a trusted supplier to EMBL for many years, particularly for Drosophila consumables. We are proud that our products have supported EMBL researchers in their daily work over such a long period and highly value this long-standing partnership.

Building on this experience, Kisker Biotech can support EMBL far beyond Drosophila. Our broad portfolio covers laboratory consumables and equipment, from pipette tips, PCR and cell culture products to solutions for sample preparation, analysis and storage.

As part of the Dominique Dutscher Group, Europe's largest independent laboratory distribution group, we combine personal, local service with the strength of more than 30 affiliated companies, an extensive European logistics network and access to leading international manufacturers.

Excellent service and customer proximity are at the heart of our approach. We offer tailored solutions and personal support through experienced contacts who understand individual laboratory needs. Alongside leading brands, our own ClearLine range provides cost-effective alternatives for everyday laboratory needs. Our commitment to responsible and sustainable business is reflected in our EcoVadis Gold Medal.

Our goal is to build on the trust already established with EMBL and explore how a broader collaboration can simplify procurement, improve product availability and identify opportunities for cost savings – allowing researchers to focus on what matters most: their science.
