ABOUT

The Intelligent Data Infrastructure Company

NetApp is the intelligent data infrastructure company, combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, harnessing observability and AI to enable the industry's best data management. As the only enterprise-grade storage service natively embedded in the world's biggest clouds, our data storage delivers seamless flexibility. In addition, our data services create a data advantage through superior cyber resilience, governance, and application agility. No matter the data type, workload, or environment, with NetApp you can transform your data infrastructure to realize your business possibilities. Learn more at www.netapp.com.

AI at NetApp: Bridging the gap between Data Science and IT operations

In the rapidly evolving landscape of artificial intelligence, efficient data management is crucial for driving innovation in research. NetApp's cutting-edge solutions empower organizations to leverage the full potential of their data. This talk will delve into the challenges faced by data scientists versus IT operations teams, provide an overview of the data platform for AI, and deep dive into some of our solutions. Attendees will gain insights into how NetApp's

DataOps toolkit streamlines data workflows, enhances collaboration, and accelerates AI model development and deployment.
