

Arthur, Plassart		
How dim is too dim? Mapping the lower light limit of photosynthesis in a polar diatom		46
Bagnaro, Antoine	Presenter: Bagnaro, Antoine	
Functional redundancy and metabolic complementarity shape community assembly in the global ocean microbiome		47
Baricevic, Ana		
Co-occurrence patterns and hidden diversity in the northern Adriatic Sea plankton community		48
Baumgartner, Dieter		
The marine snowball effect - how encounters shape the formation of marine snow		49
Bhatnagar, Anjali		
Diel and subclade variation in Trichodesmium metabolomes in oligotrophic oceans		50
Bredel, Agathe		
Charting the genomic diversity of the glacier–ocean interface microbiome		51
Brown, Julia		
Single-cell-resolved phage interactions within prokaryoplankton sourced globally from the tropical surface ocean		52
Buscaglia, Marianne		
Dissolved oxygen drives giant virus biogeography and genomic adaptation along the Chilean coastal margin		53
Buscaglia, Marianne		
Prokaryotic macroprovinces along the Chilean coastal ocean		54
Caceres, Carlos		
Effect of cellular nutrient economy on the evolution of genome size in phytoplankton		55
Camillo, Bastien		
Genomic diversity and ecological adaptation in Chaetoceros		56

Demulder, Manon	
From Global to Local: downscaling environmental sampling to urban artificial ponds	57
Dhiba, Meti Gizaw	
From river to sea: plastisphere-mediated dispersal of ESKAPEE pathogens and antibiotic resistance into the Eastern Mediterranean Sea	58
Doré, Hugo	
Influence of population dynamics and ecological strategies on evolutionary trajectories of marine bacteria	59
Dura, Mathilde	
A planktonic emerging model to address the mechanotransduction regulation of multicellularity	60
Fan, Xiaoliang	
AI-driven decoding of diatom community dynamics under environmental changes	61
Fiorile, Chiara	
Unraveling novel marine picophytoplankton-bacteria symbioses through genomics and co-cultures	62
	63
Gouzien, Corentin	
Environmental drivers of codon usage bias in marine bacterial genomes	64
Guo, Kangli	
Marine fungal phosphorus metabolism coupled to organic matter degradation across particle sizes	65
Henoch, Alexander	
Synten-aware microbial pangenomes reveal blueprints of genomic variation	66

Hümmling, Jannis	
Differences in microbial community composition and dynamics in water and sea ice during the MOSAiC expedition	67
Ibarbalz, Federico	
A combined Eulerian–Lagrangian exploration of plankton communities during coccolithophore bloom development in the SW South Atlantic	68
Iorillo, Orsola	
Complexome profiling reveals protein interaction networks in marine protists	69
Janin, Sarah	
Photosynthesis as a non-invasive diagnostic tool to study diatom responses to their environment: from single-cells to natural populations	70
Kartha, Aiswarya	
Petroleum-degrading Alcanivorax and Alloanivorax reveal functional genomic diversity and oligotrophic survival strategies.	71
Li, Shanhui	Presenter: Bibby, Thomas
Comparative Metatranscriptomics Reveals Nutrient Induced Mechanistic Changes in Photosynthesis of Southern Ocean Phytoplankton Communities	72
Liu, Tian ren	
Iron acquisition mechanisms in <i>Emiliana huxleyi</i>	73
Longo, Antonio	
Linking diatom genomic potential and expression in a coastal multi-omics observatory	74
Maman, Alexander	
Discovery of RNA phosphorothioate modifications in anaerobic and thermophilic archaea: a dynamic backbone modification coupled to environmental adaptation	75
Marec, Guillaume	
Molecular mechanisms of thermal acclimation in the <i>Cylindrotheca closterium</i> complex	76

Martone, Erica

An integrated multi-omic approach to explore ecological and functional dynamics in coastal *Pseudo-nitzschia* spp. 77

Muñoz Payá, Jorge

An Arctic phage from Tara Oceans provides insights into the ecology of viral bilin biosynthesis 78

Nadal-Molero, Francisco

Presenter: Mehrshad, Maliheh

Eco-evolutionary dynamics of active virus-host interactions in a freshwater lake: revealed through metaHi-C 79

Nikolaishvili, Sophia

Georgian Black Sea Diatoms Biodiversity in 2022-2024 80

Núñez, Diego

Presenter: Mendoza, Sebastian

Differential microbial potential among regions in the Chilean coast revealed by genome-scale metabolic modeling 81

Oms, Laurina

A modeling framework to investigate the role of ocean circulation on plankton genetic differentiation 82

Palmer, Maxfield

Investigating the molecular underpinnings of nutrient colimitation across a consortium of marine microbes 83

Planat, Laurine

PICNIC: Plankton Interactions from Cells to Networks: Isolation and Classification 84

Porcel, Betina

Convergent paths to parasitism in the ocean 85

Priest, Taylor

Diversity and dissemination of mobile genetic elements across microbial hosts and Earth's ecosystems 86

Revest, Flavie

Presenter: Jamet, Jean-Louis

Is *Oithona* the most abundant Copepoda in the world's ocean? 87

Riddell, James		
Distribution of Cyanophages Across the Global Surface Oceans		88
Rijsdijk, Nadine		
Bridging single-cell RNA sequencing and population-level metatranscriptomics to uncover drivers of sexual reproduction in centric diatoms		89
Rodríguez Miret, Xènia		
A new genome-scale metabolic model for <i>Pseudo-nitzschia multistriata</i> to better understand diatom functioning in an ecological context		90
Sasaki, Hiroto		
Ocean meta-omics uncovers the in situ life cycle of elusive parmalean algae		91
Sow, Swan Li San		
Modelling metabolic interactions of polar marine microbial communities		92
Tillmann, Urban	Presenter: Wohlrab, Sylke	
Finding a ghost: resolving one of the many sequence-only based environmental clades		93
Toro-Llanco, Nicolas		
Biogeographic structure of coastal plankton along European coasts resolved from metagenomic k-mers		94
Vasiljevic, Tea		
Diel rhythms and phase-specific cell cycle regulation in <i>Calcidiscus</i>: a flow cytometry approach		95
Wang, Fengqing		
Seasonal dynamics and functional responses of particle-attached microbial communities over an annual cycle and their associations with phytoplankton blooms at Helgoland Roads		96
Warsaw, Anna		
Building a microbiome: characterizing microbiome variation and assembly in <i>Trichodesmium</i> colonies		97

EMBL Conference: A new view of plankton in the global ocean: celebrating 10 years of Tara Oceans

Yepez, Yuri

Haplotype-resolved assemblies reveal extreme within-individual genomic divergence in the planktonic chordate *Oikopleura dioica* 98

Yogaranjan, Vitushanie

Drivers of phytoplankton biogeography in the pacific ocean: from open ocean to coastal and coral surrounding waters 99

Yu, Zhaoxi

An AI-based framework for annotating 100 million genes in one hour 100

Zhang, Yong

Synergistic and antagonistic effects of ocean warming and acidification on phytoplankton carbon fixation and their mechanisms 101

Zhao, Zihao

Niche Partitioning of Marine Microbiota in Deep Ocean Organic Matter Cycling 102
