

Aggarwal, Abhishek	
Spatial profiling of HPV-stratified head and neck squamous cell carcinoma reveals immune niches and distinct microenvironmental architectures	38
Aguilar, Adrián	
Mapping glycosylation-dependent immune cell patterning to advance gut organoids	39
Ajazi Tunér, Kristi	
Spatial transcriptomics analysis of oropharyngeal cancer tumor microenvironment in the context of myeloid cells	40
Andhari, Madhavi	
Same-cell spatial, single cell transcriptomics and proteomics to decipher melanoma cell state heterogeneity and immune interactions in metastasising early- stage melanoma	41
Andreev, Grigor	
Spatial profiling reveals ELF3-mediated stromal remodeling in the tumor microenvironment of bladder cancer	42
Andrei, Pietro	
Kandinsky: enabling neighbourhood analysis of spatial omics data for functional insights on cell ecosystems	43
Arkhypov, Ihor	
Integrated spatial transcriptomics and multiplex imaging to dissect genotype- (immune) phenotype associations in liver cancer	44
Ashcroft, James	
Spatial atlas of the human ovarian cortex from development to reproductive age	45
Baghai Sain, Simona	
Identifying shared tumor-associated cellular neighbourhoods across epithelial cancers using spatial transcriptomics and co-occurrence analysis	46

Barone, Matthias	
CD4(+)-CD8(+) T cell interaction via AICL-KLRF1 sustains cytokine production in pre-exhausted T cells	47
Behrens, Arne	
Decoding glioblastoma heterogeneity with SpatialOMx and MALDI HiPLEX-IHC	49
Ben-Uri, Raz	
Maximizing information, minimizing delays: multiplex imaging in lung cancer diagnosis	50
Benz, Michaela	
Putting multi-omic spatial biology analysis into the hands of biologists	51
Berger, Sarah Alina	
An in situ approach to understanding induction and function of FAS-controlled T cells	52
Berkhout, Jari	
Characterizing hypothalamic paraventricular nucleus cell populations using spatial transcriptomics and retrograde tracing	53
Beštak, Krešimir	
Scalable and reproducible analysis of molecular cartography data with nf-core/molkart	48
Bigott, Kevin	Presenter: Neto, Diogo
Enhanced 3D visualization of larger tissues using non-toxic clearing and REAfinity fluorescent labeling	54
Blatkiewicz, Malgorzata	
Spatial transcriptomic atlas of mouse adrenal and adipose tissues, with cross-species conservation of marker genes in the human adrenal gland	55
Boos, Alena	
Low- vs high-resolution Visium in spatial transcriptomics: performance, limitations, and use case guidance	56

Buljan, Iva	Presenter: Rendeiro, André	
A multiscale atlas of human tissue architecture and its change with aging		57
Bull, Joshua		
MuSpAn: a multiscale spatial analysis toolbox		58
Burrus, Anaïs		
Enhancing spatial proteomics through deep learning based information transfer between antibody panels		59
Bussi, Yuval		
CellTune: An integrative software for accurate cell classification in spatial proteomics		60
Campos Medina, Manuel		
Highway2Cell: Spatial Omics as a service at a core facility		61
Carreño Martínez, José Francisco		
Dissecting biases in image-based spatial transcriptomics: a cross-platform evaluation of processing pipelines		62
Cellini, Beatrice		
Aloa 2.0: an enhanced pipeline for advanced analysis and interactive visualization of spatial profiling imaging data		63
Cetin, Miray		
Quantifying spatial metabolic remodeling upon mitochondrial inhibitor treatment in HER2-negative early breast cancer patients		64
Chang, Jacob		
Differential colocalization of cell type pairs in single-cell spatial omics with DC-SPOMIC		65
Christians, Arne	Presenter: Metzger, Thibaud	
Innovative multiomic spatial biology assay for comprehensive immune characterization of the tumor microenvironment		66
Chwatal, Götz		
Optimizing tissue preparation for ST analysis of mouse FFPE bone marrow		67

Dahl, Xenia Goldberg	
Transcriptomic and spatial proteomic analyses uncover CAF reprogramming and stromal remodeling following neoadjuvant therapy in pancreatic cancer	69
Dasgupta, Ishita	
Decoding the skin ulcer niche using single cell spatial omics	70
de Back, Walter	
Mitigating uncertainty in cell segmentation for spatial transcriptomics	71
de Boer, Fleur	
Spatial epigenomic and transcriptomic co-profiling in multiple sclerosis models	72
Denker, Svenja	
Exploring gonadal development in differences of sex development using spatial transcriptomics	73
D'Ercole, Chiara	
Muscle glial cells are responsive to muscle damages	68
Diederich, Benedict	Presenter: Niemeyer, Franziska
StainSTORM: an open-source automated workflow for chromogenic cyclic immunohistochemistry on cancer tissue slides	74
Divita, Tessa	
Spatial proteomics uncovers immune dysfunction and tumor microenvironment heterogeneity in high risk non-muscle invasive bladder cancer	75
Drake, Richard	
Spatial N-glycomic profiling of glomeruli and tubules in kidney disease biopsy tissues linked with patient matched biofluid analyses	76
Dreisbach, Domenic	
Towards multimodal spatial pathology - integrating QCL IR microscopy for rapid and label-free chemical imaging	77

Dufeu, Marion	
Tumoral and microenvironmental heterogeneity fuels dynamic ecosystems during early cutaneous melanoma progression	78
Einhaus, Jakob	
Tumor microenvironment characteristics in oral squamous cell carcinoma recurrence	79
El Yassour, Fabio	
Phenotypic and functional characterization of CAR T cells in a preclinical model using the MACSima™ spatial multiplexing platform	80
Elhanani, Ofer	
Phenotypic, microenvironmental, and genetic crosstalk shapes pancreatic cancer organization	81
Emons, Martin	
Quantification and multi-sample comparison of spatial omics data using spatial statistics with pasta and spatialFDA	82
Englert, Nils	
Building a translational spatial profiling center	83
Ermakova, Yulia	
UnO - Universal oligo adaptors for high-efficiency DNA-barcoded antibody panel generation	84
Espinola, Sergio	
Benchmarking in-house protocols for in-situ sequencing (ISS) and seqFISH in spatial transcriptomics	85
Femel, Julia	
Expanding spatial biology tools for murine research: REAplex antibody panels for immune profiling, tissue architecture, and neuroscience in mouse cryosections	86
Ferguson, Dougal	Presenter: Dreisbach, Domenic
Whole slide chemical imaging within clinical timeframes using QCL IR microscopy: A road to clinic breakthrough	87

EMBL Conference: Spatial biology: the melting pot

Fiedler, Alexander	
Metaflimb reveals spatial and temporal metabolic heterogeneity of myeloid cells during in vivo bone regeneration	88
Fu, Ye	Presenter: Lambert, Jeremy
Advancing high-resolution 3D spatial transcriptomics in thick tissue using a multiplex, sub-cellular approach	89
Gabrielli, Natalia	
MULTI-SPACE: a cross-Institutional platform for spatially resolved omics technologies	90
Gaudilliere, Dyani	
Integrated local spatial and peripheral immunity reveals biomarkers of systemic dysfunction in periodontitis	91
Germar, Henrike	
Spatial characterization of immune dysregulation in periodontitis reveals lymphocyte expansion and inflammatory fibroblast subsets	92
Gomez-Velazquez, Melisa	
Using a FFPE or an FF sample can impact the spatial transcriptomic output in a tissue-dependent manner	93
Gonzalez Tirado, Sebastian	
Comparative framework for integrating digital pathology and spatial transcriptomics	94
Guastella, Beatrice	
Spatial transcriptomics-informed inference of cell types and states from nuclear-stained whole slide images	95
Hada, Aroj	Presenter: Chazotte, Margot
spCellEval (spatial proteomics Cell phenotyping Evaluation); Benchmarking cell-phenotyping methods for antibody-based multiplexed imaging	96
Hada, Aroj	
Automated cell phenotyping in spatial proteomics via LLM-guided knowledge distillation	97

Hadji Rasouliha, Sheida	
How to integrate spatial biology techniques in your lab/core facility	98
Haist, Maximilian	
Lymph node colonization induces cellular and architectural tissue remodeling via immunosuppressive myeloid cells supporting metastatic tolerance	99
Hanimann, Jacob	
An integrated morpho-molecular framework for deconstructing clinical and prognostic features in colorectal cancer	100
Hawinkel, Stijn	
Statistical tests for bivariate spatial association of multi-omics data	101
Heidari, Elyas	
Scalable and reliable cell segmentation of imaging-based spatial transcriptomics using graph neural networks with segger	102
Heinrich, Hannah	
Multi-omics spatial analysis of chromophobe renal cell carcinoma reveals intra-tumor heterogeneity with cell-type specific metabolic alterations	103
Herreman, Karen	
Challenges and strategies for single-cell resolution analysis of Visium HD	104
Hofmann, Sarah	
Spatial mapping of lymph node lymphatic endothelial cell and immune cell interactions in checkpoint-resistant and -sensitive melanoma models	105
Høye, Eirik	
Mapping immune clonotypes in prostate cancer using spatial V(D)J to resolve cancer vaccine response	106
Hu, Wangjun	
Muster - an interpretable method for spatial pattern detection and cross-condition analysis from multi-omics data	107

Ibarra, Miguel A.	
micronuclAI: A tool for automated quantification of micronuclei for chromosomal instability assessment	108
Irshad, shumaila	
Mapping the metastatic niche in oral cancer with neighbor labelling system	109
Jones, Aragorn	
The Human Developmental Biology Resource	110
Junquera, Ada	
Single-cell spatial proteomics reveals cell-cycle resolved tumor architecture in ovarian cancer	111
Kala, Smriti	Presenter: Klug, Melissa
Imaging Mass Cytometry detects the true dynamic range of low-abundance biomarker expression in human tumors	112
Kaufmann, Louisa	
High-dimensional spatial profiling of the tumor immune microenvironment in cured and refractory/relapsed diffuse large B cell lymphoma	113
Keller, Mark	
Enhancing Vitesse: multi-omics data formats and comparative analyses	114
Keneskhanova, Zhibek	
Hierarchies decoded: high-resolution single-cell view of VSG switching in T. brucei	115
Kibler, Artur	
Age-dependent remodeling of the human splenic marginal zone revealed by high-dimensional tissue profiling	116
Kleijn, Istvan	
Detecting proliferative subclones in breast cancer core biopsies with spatial transcriptomics	117
Köhler, Nikolai	
Sequence-based subcellular RNA colocalization prediction	118

Kroh, Sandy	
Unraveling the myeloid niche in murine bone marrow during bone injury	119
Kulkarni, Shubhada	
Spatial transcriptomics of diseased mouse hearts	120
Kunzke, Thomas	
Near-single-cell multi-target quantification of anti-tumor therapeutics via deep learning-based quantitative continuous scoring (QCS) with co-registration of adjacent IHC-stained tissue sections	121
Kurki, Veera	
Biological validation of a semi-automated high throughput immunohistochemistry protocol for FFPE tissues and cytospin cell preparations	122
Kysilovsky, Cassandra	Presenter: Derakhshani, Sherry
Establishing a robust and reproducible automated mIF workflow for spatial biology using ZEISS SlideStream and Ultivue by Vizgen's InSituPlex assays	123
Laghaee, Seyedpouria	
Comprehensive machine learning workflow for high-throughput imaging flow cytometry analysis in clinical diagnostics	124
Lagwankar, Asmita	
Benchmarking quality control and integrated analysis across spatial transcriptomics technologies for HuBMAP organs	125
Lazic, Daria	
Evaluating cell segmentation methods for spatial transcriptomics: challenges and comparative insights	126
Levi-Galibov, Oshrat	
Intratumor heterogeneity affects immune-mediated tumor rejection	127

Li, Mujia	Presenter: Föll, Melanie	
In situ peptide identification by parallel-accumulation-serial fragmentation supported MALDI MS/MS imaging: a tool for spatial proteomics in complex disease tissues		128
Li, Tong		
Enabling scalable and multimodal spatial omics analysis at the Sanger Institute		129
Li, Tong	Presenter: Makarchuk, Stanislaw	
Enabling scalable and multimodal spatial omics analysis at the Sanger Institute		130
Lian, Guang-Yu		
Spatial profiling identifies tumour microenvironment-driven JAK/STAT3 signalling as a radiosensitisation target in rectal cancer		131
Liu, Yu		
Decoding spatial context of therapy resistance: telomerase inhibition targets persister metabolism via SUCLG2		132
Lohmann, Frederieke	Presenter: Vasiljevic, Jelica	
From genes to images: leveraging spatial transcriptomics for histological image generation		133
Luijts, Tom	Presenter: Luijts, Tom; Croughs, Quinn	
Predicting TP53 DNA mutations in tumor tissues from spatial transcriptomics data		134
MacAulay, Calum		
Explicitly allowing for cell and nuclear overlap, one pixel to many objects mapping for improved marker evaluation in spatial biology		135
Machaalani, Charbel		
Molecular and spatial insights into treatment failure in pediatric low-grade gliomas		136

Maguza, Anna		
Mapping human intestinal stem cell niche organization through spatial multi-omics		137
Mallm, Jan-Philipp		
FAIRification of spatial omics data		138
Mangold, Maike		
Tracking CD40L+ CD8+ T cells in the human body using spatial high-content imaging		139
Manzato, Benedetta		
Image-guided alignment of consecutive multi-modal whole-tissue slides with coast		140
Mao, Qirong		
Evaluating genetic therapies targeting central nervous system in Duchenne Muscular Dystrophy using high-resolution spatial transcriptomics		141
Marceaux, Claire	Presenter: Tarasova, Ilariya	
Spatial proteomics reveals a novel T cell subtype associated with worse survival in non-small cell lung cancer		142
Martinez, Karina		
Spatial profiling of tertiary lymphoid structures in brain metastases		143
Marwitz, Sebastian		
A spatial signature of excluded immune cells that drives superior long-term survival in NSCLC		144
McKenzie, Molly	Presenter: Hatthakarnkul, Phimmada	
IKKα expressing tumours demonstrate pro-metastatic transcriptomic profiles and can be targeted to reduce proliferation in colorectal cancer		145
Merseburger, Peter		
Spatial transcriptomics reveals tumor microenvironment remodeling in high-risk neuroblastoma after inhibition of the DNA damage response		146

Meyer-Bender, Matthias		
Spatialproteomics - an interoperable toolbox for analyzing highly multiplexed fluorescence image data		147
Mittwali, sameeha		
remodeling in brain metastases of melanoma revealed through spatial multiplexed imaging		148
Moerth, Eric	Presenter: Moerth, Eric; Marconato, Luca	
Unlocking 3D context in spatial biology through interoperable and performant data formats and visual exploration tools		149
Moerth, Eric		
Nexus - interactive visual exploration of 2d and 3d spatial connectivity for tissue analysis		150
Moore, Joshua		
Towards spatial signatures of treatment response in colorectal cancer		151
Moreno Ambrozini, Leticia		
Spatial transcriptome analysis of archived gonadal tissue from patients with differences of sex development		152
Mortier, Julien	Presenter: Vernailien, Frank	
Benchmarking sequencing-based spatial transcriptomics technologies		153
Müller, Christin-Therese		
Spatial profiling of colorectal cancer reveals cell types associated with ctDNA shedding		154
Muscat, Jennifer Claire		
Investigating microenvironmental drivers influencing lineage fate in pancreatic ductal adenocarcinoma		155
Nebelung, Hanna		
Cell type specific characterization of prostate cancer gene signatures with spatial transcriptomics in targeted biopsies		156

Nguyen Phuong, Anh

Establishing a robust image denoising and segmentation pipeline for multiplexed immunofluorescence of colorectal cancer 157

Novoselsky, Roy

HiVis: a flexible and user-friendly tool for VisiumHD image analysis, data exploration and visualization 158

Oetjen, Janina

Presenter: Kiss, Andras

Benchmarking multiomic imaging on a benchtop MALDI instrument 159

Oetjen, Janina

Presenter: Wendik, Björn

Spatial multiomics characterization of human lung carcinoma 160

Okhtienko, Anastasiia

Spatial proteomics characterization of HBV-mediated liver disease 161

Oses, Carolina

Unveiling cellular complexity: comprehensive multiplexed spatial proteomics solutions for discovery and translational research 162

Østergaard, Stine

Presenter: Diaz-delCastillo, Marta;
Østergaard, Stine

Single-cell spatial characterization of the human bone marrow microenvironment in premalignant myeloma 163

Pak, Valeriy

Hijacking of pro-survival signaling promotes follicular lymphoma transformation 164

Patrick, Michael

Presenter: Yujnovsky, Irene

Integrating single-cell spatial whole transcriptome and histopathology to uncover drivers of tumor heterogeneity in lung adenocarcinoma and squamous cell carcinoma 165

Peña, Eduardo

The potential of the tumour microenvironment as a prognostic biomarker in invasive lobular breast cancer 166

Pentimalli, Tancredi Massimo		
3D multimodal analysis of cellular and ECM interactions in the lung cancer microenvironment		167
Pesti, Benedek		
Deciphering treatment effect via spatial transcriptomics in an Alzheimer's disease mouse model		168
Pfeiferova, Lucie		
scdrake: a reproducible and scalable pipeline for scRNA-seq and SRT data analysis		169
Pfister, Tom	Presenter: Klug, Melissa	
Spatial profiling of exhausted T cells using high-plex Imaging Mass cytometry		170
Pfister, Tom	Presenter: Klug, Melissa	
Spatial profiling of the tumor microenvironment using Imaging Mass Cytometry: unraveling metabolic reprogramming and cell signaling dynamics in cancer		171
Pinard, Robert	Presenter: Meyer, Hansueli	
Spatial profiling of T- and B-cell receptors: a same-section multiomics approach using in-situ sequencing		172
Poos, Alexandra		
Single-cell and spatial multi-omics profiling of bone marrow-independent disease in multiple myeloma		173
Prieto Fernandez, Llora		
Spatial characterization of CAFs heterogeneity in oral tumor microenvironment		174
Rademacher, Anne		
Spatial transcriptomics: from low-throughput manual analysis to automated RNA profiling and custom multiplex protocols		175
Rajesh, Suzanne		
A unique workflow to discover biomarkers of response to treatment in clinical prostate cancer patient tissues		176

Ramialison, Mirana	Presenter: Tang, Shijia; Ramialison, Mirana	
End-to-end spatial transcriptomics analysis with VR-Omics		177
Rausell, Claudio Novella		
Regularised multimodal graph neural networks for spatial metabolic prediction		178
Raza, Qanber	Presenter: Klug, Melissa	
Synergistic spatial profiling: unifying Xenium transcriptomics and Imaging Mass Cytometry proteomics for holistic tissue characterization		179
Reinhardt, Robert	Presenter: Jevdokimenko, Kristina	
Label-decoupled spectral imaging for spatial biology: a SABER-based framework for custom high-plex panels		180
Rettig, Anika		
Quantifying IMC data analysis step by step: a comparative evaluation of MICCRA (Modular IMC Cell Characterization with automatic Region Assembly) and traditionally used approaches		181
Rius Rigau, Aleix		
Imaging mass cytometry-based characterisation of fibroblast subsets and their cellular niches in systemic sclerosis		182
Rodriguez Morales, David		
Vascular niches are the primary hotspots for aging within the multicellular architecture of cardiac tissue		183
Rosenbauer, Jakob		
Spatial immune landscape of glioma following immunotherapy		184
Roseth, Ingrid	Presenter: Hatscher, Lukas	
Highly multiplexed imaging recovers immune and metabolic niches in multiple myeloma associated with disease progression and bone involvement		185
Sachova, Jana		
Identifying intercellular patterns in vestibular schwannoma		186

Scheuermann, Sophia

Comprehensive spatial immune profiling of NUT carcinoma identifies novel prognostic signatures and B7-H3 as a target for CAR-T cell therapy 187

Schiller, Chiara

Comparison and optimization of cellular neighbor preference methods for quantitative tissue analysis 188

Schimmel, Patrick

Spatial characterization of IBD remission: mechanisms of FMT efficacy beyond strain engraftment 189

Schlaeppi, Anjalie

Presenter: Sordet-Dessimoz, Jessica

Implementing multi-omics histology in a core facility 190

Schneider, Fabian

PhenoScout: foundation AI models for end-to-end tissue analysis of mIF and IHC slides 191

Schrader, Ellen

Spatial determinants of short and long-term survival in 4983 breast tumours 192

Schuch, Katharina

Rare cell analysis: relevant pre-analytical insights for spatial transcriptomics 193

Serrano de Haro Ivanez, Sergio

TopROI: automatic topology-preserving ROI detection for structural spatial analysis 194

Shabanova, Aleksandra

Integrated spatial and multi-omic analysis of HGSC to uncover immune evasion and therapeutic targets 195

Skeppås, Madeleine

Transcriptional signatures of invasion in pediatric diffuse midline glioma 196

Slaats, Emiel		
Image based single nucleotide polymorphism detection for distinguishing cells from different individuals within the spatial context of a tissue		197
Steinek, Clemens		
Transient exchange PAINT enables precise detection with low-affinity binders		198
Strasser, Rob		
Single-nucleus and spatial transcriptomic mapping of the breast cancer liver metastasis microenvironment and its alterations after taxane treatment		199
Sun, Jieran	Presenter: Biharie, Kirti	
Beyond benchmarking: an expert-guided consensus approach to spatially aware clustering		200
Sutevski, Iva		
Leveraging spatial proteomics for molecular and single-cell insights into neurodegenerative diseases		201
Tagscherer, Nina		
Spatially exploring the transcriptome of tumor and its environment to overcome therapy resistance in renal cell carcinoma		202
Tan, Yuqi		
Scaling up spatial insights: from 2D to 3D tissue analysis		203
Toma, Federica		
Mapping the tumor-microglia cd147 axis in ependymal neoplasms		204
Tran, Thao	Presenter: Claesen, Marc	
Investigation of tissue biology using Weave: a cloud-based software for spatial multi-omics data analysis		205
Trojanowski, Jorge		
Multiplex proximity detection by primer exchange reaction resolves RNA life cycle stages in situ		206

Tsai, Amy

Development of a novel imaging mass cytometry panel to distinguish antibody-mediated and T cell-mediated rejection in human kidney allografts 207

Túró, Demeter

Spatiotemporal organisation of residual disease in mouse and human BRCA1-deficient mammary tumours and breast cancer 208

Ullman, Tony

Presenter: Stadler, Charlotte K.

A novel assay for combined detection of PD1-PDL1 interaction and cell phenotypic profiling as a predictive biomarker for response to immunotherapy 209

Ulrich, Hanna

Presenter: Adlung, Lorenz

Spatio-metabolic shift in lipid-associated macrophages (LAMs) controls murine subcutaneous adipose tissue aging 210

Unterauer, Eduard

Super-resolution microscopy as a tool for spatial proteomics at molecular scale 211

Uyar, Recep

From nanoparticles to niche reprogramming: spatial transcriptomics reveals therapy-responsive microenvironments 212

Valdeolivas, Alberto

Presenter: Kumpesa, Nadine

Interrogating the tumor microenvironment in cancer core-needle biopsies with high-resolution spatial transcriptomics 213

van der Voort, Gemma

Neutrophil response to adoptive T cell therapy in murine melanoma: a spatial perspective 214

Van Hamme, Evelien

Driving discovery with spatial technologies: the VIB approach 215

Vierdag, Wouter-Michiel

Harmonization and FAIRification of a visualization ecosystem for spatial omics data 216

Visser, Luca	Presenter: Mylka, Viacheslav; Steenberghen, Hugo	
Benchmarking cell segmentation methods for single-cell spatial transcriptomics		217
Visvikis, Theodoros		
From pixels to patterns: Integrating Mass Spectrometry Imaging into SpatialData		218
Vlachou, Evi		
Spatiotemporal bone marrow reconstitution after transplantation in AML patients		219
Vulliard, Loan		
Coordinated multicellular programs in the colorectal cancer microenvironment		220
Wang, Xiuqi		
Pan-cancer proteogenomic and spatially resolved profiling of 1,000 brain metastases reveals mechanisms of brain tropism and therapeutic vulnerabilities		221
Weissbach, Stephan		
Mapping the landscape of kidney glomerular injury through spatial transcriptomic analysis in preclinical models		222
Widmaier, Moritz	Presenter: Derakhshani, Sherry	
Enabling scalable tumor microenvironment (TME) profiling with 8-plex InSituPlex multipleximmunofluorescence (mIF) on ZEISS Axioscan 7 spatial biology		223
Wieme, Xander		
A systematic comparison of spatial cell-cell communication tools relying on graph neural networks		224
Wirth, Johannes		
InSituPy – A framework for histology-guided, multi-sample analysis of single-cell spatial transcriptomics data		225
Wirth, Maximilian		
Towards predicting treatment outcome in hepatocellular carcinoma from histopathological images using ai tools		226

Wong, Siao-Han	
Advancing AI in digital pathology through spatial omics-guided molecular annotation	227
Woraharn, Walaiphorn	
Opposing architectural roles of cancer-associated fibroblasts at the invasive front characterize primary colorectal cancer growth patterns	228
Yaghoubi Naei, Vahid	
Spatially resolved multi-marker analysis of tumour–microenvironment interactions in head and neck cancers	229
Yagnik, Gargey	Presenter: Lim, Mark
Photocleavable mass-tagged affinity probes for comprehensive spatial multiomics of drugs, metabolites, glycans, mRNAs and proteins on the same tissue section	230
Yasin, Tayyaba	
Mitochondrial inactivation in mesenchymal stem cells impairs mitochondrial transfer and alters breast cancer cell function	231
Youssef, Omar	
Cross-platform validation of spatial transcriptomic signatures in high-grade serous carcinoma using Visium and GeoMx	232
Zanardelli, Gianni	
CyclEM: spatially resolved mapping of cell cycle dynamics in the tumor microenvironment	233
Zeiger, Lucas	
Spatially resolving MAPK-driven cellular plasticity in colorectal cancer using genetically engineered mouse models	234
Zhao, Shuchang	Presenter: Piatkevich, Kiryl
Spatially Resolved UltraVisual MicroProteomics via Hydrogel-Based Tissue Expansion: microProteomEx	235
Zucha, Daniel	
Decoding spatiotemporal glial responses in acute stroke and progressive MS through scalable re-analysis of spatial transcriptomics	236
