

Beck, Katharina	
When Homology Fails: Functional Diversity in urocanate reductases	40
Beliaeva, Mariia	
Environmental and gut bacterial biotransformation of synthetic steroids reveals broad metabolic capacity and novel desmolase-like activity	41
Berthold, Dorothée	
Towards a mechanistic understanding of fiber shaping a gut bacterial community	42
Brunet, Theo	
Metabolic modelling of the defense mechanism of E. coli during bacterial predation	43
Despotovic, Dragana	
Probing evolutionary tradeoffs in pesticide adaptation mechanisms of marine microbial ecosystems	44
Dhar, Gaurab	
Metabolic interactions in the infant gut microbiota inferred from genome-scale metabolic modelling	45
El Aouadi, Fatima	
Volatile organic compounds from rhizobia and non-rhizobia: Emerging roles in plant–bacteria signaling and growth promotion	46
Elgin, Resul Gökberk	
Mining protein and chemical space to explain microbial phenotypes	47
Erbstein, Katarina	
Maphelios: mapping-based high-throughput exploration of sequencing data	48
Fan, Qilian	
Multi-Omics Profiling Reveals Microbial Ecology of Fish Spoilage Under Different Storage Conditions	49

Feng, Xiaoxi	Presenter: Feng, Xiaoxi; Pora, Marie	
Gut microbiota-derived indole metabolites enhance the cytotoxic effect of multi-kinase inhibitors in colorectal cancer cells		50
Ferrero, Arián		
Single-cell metabolic flux analysis integrated with statistical mechanics reveals emergent microbial phenotypes arising from metabolic heterogeneity and cross-feeding		51
Ganley, Jack	Presenter: Li, Tina	
Reciprocal signaling systems govern lifestyle switching in marine bacteria		52
Geerlings, Nicole		
Imaging-based single-cell transcriptomics to study ecological strategies in complete ammonia oxidizing bacteria		53
Haag, Mathias		
Interactions of the breast cancer drug tamoxifen and its liver-derived metabolites with the human gut microbiota		54
Henrich, Astrid	Presenter: Herencias, Cristina	
Metabolic versatility and ecological interactions shape the colonization dynamics of extraintestinal pathogenic E. coli		55
Henriques, Sílvia		
Microbiome induced reprogramming of nitrogen metabolism counteracts the deleterious effects of amino acid imbalanced diets		56
Huang, Eugene		
Exploring the Altiarchaeal CO₂ Fixation Pathway: An Uncultivated Archaeon from the Deep Biosphere		57
Huang, Yun Ju		
Biotransformation of isoflavones in okara through sequential solid-state fermentation of <i>Aspergillus oryzae</i> and <i>Lactobacillus paracasei</i>		58
Jacoby, Richard		
PestiBASE - A website for exploring visualisations from a large experimental dataset of microbial pesticide biotransformation		59

Janez, Nika		
Metabolomic and genomic basis of nutrient-driven differences in biofilm formation between epidemiologically distinct <i>Listeria monocytogenes</i> strains		60
Jeckel, Hannah		
Microbial communities in context: dissecting rhizobiome interactions		61
Jourdain, Lisa	Presenter: Gu, Wenyu	
Stickland metabolism operates as a distributed community property governed by hierarchical thermodynamic constraints		62
Jyoti, Jyoti		
Leveraging agent-based modeling and co-occurrence data to validate a generalized metabolic model of species interaction in the human gut microbiome		63
Kamrad, Stephan		
Emergent proteomic and metabolic interactions in gut bacterial co-cultures		64
Kojic, Marko		
A tale of twin water-soluble polymers: microbial metabolism drives distinct biodegradation dynamics		65
Konow, Sara		
Title: From co-culture growth dependency to community trade-offs: a Pareto frontier approach		66
Kreis, Lenard		
The bee gut microbiome as a metabolic interface reshaping pesticide exposure		67
Kühnel, Benedikt		
A comparative study of polar metabolites in microplankton along the european coastline		68
Le Gac, Constance		
Predicting the metabolic phenotype of gut bacteria as a function of host diet		69

Lee, Nga Yin Megan	
Temporal resource niche partitioning enables microbial coexistence but is sensitive to resource supply	70
Leeman, Jacob	
Expanding the chemical diversity and biosynthesis of thio/seleno-imidazole natural products	71
Mariotto, Piero	
Decoding microbial complexity: MiNeSi an in-silico framework for simulating microbial ecological interactions	72
Moawad, Alix	
Prediction of minimal metabolic exchanges for microbial communities in a chemostat at steady state	73
Nelson, Megan	
A mass spectrometry resource for mapping environmental exposure metabolites across biological systems	74
Olweny, Geoffrey	Presenter: Diener, Christian
Flux derived metabolic niches reveal resource use in the human gut microbiome	75
Quinn, Andrew	
Reciprocal interactions between agrochemicals and the commensal gut microbiota of honeybees	76
Quiros Rodriguez, Isabel	
Assembly and robustness of a stable microbial community under environmental perturbations	77
Raach, Benjamin	
Proteome Allocation Constrains Microbial Growth in Fluctuating Nutrient Environments	78
Romero, Lorena	
Persistent metabolic reprogramming induced by single-dose antibiotic exposure in rainbow trout: a multi-omics approach	79

Romero García, Fabricio	
A multi-omics framework of <i>Gardnerella vaginalis</i> biofilm divergence and metabolite driven modulation of vaginal communities	80
Schacksen, Patrick	
In-silico characterisation of putative poly(aspartic acid) hydrolases in aquatic environments	81
Sharma, Vaibhav	
Selection for coexistence redirects predatory antagonism towards metabolic dependency	82
Sichert, Andreas	
A division of labor controls the degradation of fucoidans in the ocean	83
Silverman, Shaelyn	
Bacterial interactions and spatial patterns of metabolism on marine particles	84
Stubbusch, Astrid	
Metabolic strategies that shape ecosystems: antagonistic foraging, hydrogen cycling, and metabolic flexibility	85
Tirumalai, Madhan	
Dormancy, resuscitation, and stress survival in a spacecraft clean-room actinobacterium	86
Unni, Rahul	
Linking metabolic interactions to colonization resistance in gut microbial consortia	87
Weiss, Anna S.	
When interactions change: Metabolic feedbacks drive dynamic microbial interactions	88
Xiong, Chan	
Copper Competition at the Human-Microbiome Interface: Single-Cell Insights into Metal Homeostasis within a Synthetic Gut Ecosystem	89

Yanuka-Golub, Keren

Plant invasion and global change reshape soil–microbiome interactions through soil legacy and exudate-driven responses 90

Zulfiqar, Mahnoor

Presenter: Mastrorilli, Eleonora

FAIRification of microbial biotransformation data across ecosystems: interactive platforms for contextual exploration and reuse 91
